

# The Tambiz Manual

Everything needed to run Tambiz, from the workbook you prepare to the results email each student receives, and to look after the app from one year to the next. Written for someone who has never opened it.

**Fourth edition: rewritten for the app as it now is**

September 2026

FEU Manila · Tambiz judging, results and grades · [tambiz-calculator-lyart.vercel.app](https://tambiz-calculator-lyart.vercel.app)

## Before you start

Tambiz is the awarding night of MGT1114 Business Plan 2. Groups defend their business plan and run a booth, a panel of judges scores them, and every student's grade comes out of those scores. The Tambiz app does the scoring, the ranking and the grading. It asks for **one workbook in** and hands you **two files out**.

### READ THIS FIRST

**This edition replaces every earlier one.** The app was cut back in September 2026 to seven coordinator tabs and two judge screens. The class roll, the adviser list, the groups and members pages, the students' and advisers' private links, the release screen and group codes are all gone. If you have an earlier printed copy, recycle it: its pictures show screens that no longer exist.

## What is in this manual

| CH. | CHAPTER                      | WHAT IT COVERS                                                                                                                             |
|-----|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 1   | How Tambiz thinks            | Events, groups, judges, the two halves, what "submitted" and "closed" mean                                                                 |
| 2   | Preparing the workbook       | Your own file from the template, built a few rows at a time, and checked before it goes in                                                 |
| 3   | Setting up                   | Signing in, the event, the scoring sheet wording, the upload, the judges' slips, opening judging                                           |
| 4   | How a score becomes a grade  | One student worked through from judges' scores to the FEU letter band                                                                      |
| 5   | The judge's side             | Every tap a judge makes, on a phone                                                                                                        |
| 6   | Your evening                 | Progress, correcting a score, what stops the event closing, closing it                                                                     |
| 7   | Results, grades and profiles | The Results tab, individual grades, judge profiles and the workbook                                                                        |
| 8   | The two files and the emails | The workbook, the email file, and sending with Power Automate                                                                              |
| 9   | Running and looking after it | What it is made of, the accounts, changes, passwords, the yearly cycle, the month-before checklist, troubleshooting, records, handing over |
| 10  | What is not built yet        | An honest list                                                                                                                             |

"At a glance", one page to keep beside you on the night, closes the manual.

## How to read the steps

Wherever there is something to do, it is a numbered step with one action, like the worksheets you already know. Do them in order. Three kinds of box appear beside the steps:

|                                                                                                |                                                                                  |                                                                 |
|------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|-----------------------------------------------------------------|
| <b>TYPE EXACTLY THIS</b><br>Judge confirmed 16, typed<br>0<br>Type it character for character. | <b>IF IT GOES WRONG</b><br>What you see when a step fails, and<br>how to fix it. | <b>READ THIS TWICE</b><br>A rule that decides grades or awards. |
|------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|-----------------------------------------------------------------|

Words in **bold** are the words on the screen or in the file.

## Where the pictures come from

Every picture of the app was taken on 18 and 19 September 2026 from the app as it now stands, running on a laptop with its own empty database, so that nothing was typed into the live app. The pictures follow one invented year, **Tambiz 2028**, from the empty Data tab to the email file: six groups, eighteen students, four judges. Every student, adviser, judge, email address and business name in them is invented. The criterion wording is an example, not the department's.

## What you need

- A laptop with a web browser, for everything the coordinator does. Judges need only a phone.
- Microsoft Excel, or any spreadsheet program that saves **.xlsx** files.
- The list of students, their groups and advisers, which your staff type into the app's template (chapter 2).
- The judges' names and email addresses.
- The criterion wording of the department's scoring sheet, one line per criterion, in Word or Excel.
- For sending the results: an FEU Microsoft 365 account with Power Automate (chapter 8).

# How Tambiz thinks

Seven ideas. Once they are clear, every screen makes sense.

## One workbook in

Students with their group and adviser, and the judges. You upload it on the Data tab.

## Judges score

Each on their own phone, group by group, in the Defense or the Booth.

## You close the event

When every group is judged, nobody can change a score.

## Two files out

The workbook for the department, and the email file that sends each student and adviser their result.

## 1.1 An event is one year

Each year's Tambiz is one **event**, for example **Tambiz 2028**. Its students, groups, advisers, judges and scores all belong to it and to nothing else, so last year can never leak into this year's grades. Past events stay in the list, readable, for as long as the app exists. The app also comes with a **practice event**, full of invented people, for trying things out.

## 1.2 Groups, students and advisers

A **group** is a business, known only by its name, for example **KAPE KULTURA**. There are no group numbers. Each **student** belongs to one group. Each group has one **adviser**; an adviser may have several groups. All three come from the same rows of your workbook: the groups are the different names in its Group column, the advisers the names in its Adviser column.

Group names are compared ignoring capitals, spaces and punctuation, so **Kape Kultura** and **KAPE KULTURA** are the same group.

## 1.3 Judges

A **judge** signs in with their own email and password, on their own phone. The app makes the password and shows it to you once, on a sign-in slip to print. Because every judge signs in as themselves, the app knows who gave every score, which is what makes corrections and judge profiles possible. A judge's account is kept from year to year.

## 1.4 Two halves, seven categories

Every group is judged twice: in the **Defense** and at the **Booth**. Each half has its own categories, and each category a list of criteria with a maximum for each.

| HALF           | WEIGHT | CATEGORIES (CRITERIA · POINTS)                                                                                                                                                     |
|----------------|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Defense</b> | 70%    | Elevator Pitch (5 · 100) · Infomercial (4 · 40) · Paper (9 · 100) · Product Demo (3 · 100). Defense judges also score every student: Presentation /20, Communication /40, Q&A /40. |
| <b>Booth</b>   | 30%    | Best Business Plan Booth (8 · 100) · Student Innovation (4 · 100) · Best Product Demonstration (6 · 100)                                                                           |

39 criteria in all: 21 in the Defense, 18 at the Booth. The points, the 70/30 weights and the letter bands are fixed; only the wording of each criterion can be changed on screen (chapter 3).

## 1.5 A sheet, and what "submitted" means

One judge's scores for one group in one half is a **sheet**. A judge fills it in and then taps **Mark group complete**. That sheet is now **submitted**.

#### READ THIS TWICE

**Only submitted sheets count.** A sheet a judge started and never marked complete counts for nothing: not in any percentage, rank, grade, file or judge profile. The Progress tab shows these as **in progress** · **not counted** so you can chase them.

## 1.6 A blank is never a zero

A criterion nobody scored is left out, not counted as zero. A group that is not fully scored reads **Incomplete** and gets no rank, so a half-judged group never looks like a weak one. The single exception is a student marked **absent** from the defense: their own individual scores count as zero (chapter 4).

## 1.7 Closing, and the point of no return

When judging is over you **close the event**. Judges can no longer change a score, and the two files are ready. You can still undo closing, and you can still correct a score with a reason, **until you download the email file**. From that moment nothing about the event can change, because the emails would no longer match.

| THE EVENT SAYS                | WHAT IT MEANS                                                                                               |
|-------------------------------|-------------------------------------------------------------------------------------------------------------|
| Open for judging              | Judges on the event can score. You can change anything.                                                     |
| Closed                        | Judges cannot change scores. You can correct a score with a reason, download the workbook, or undo closing. |
| Closed, email file downloaded | Final. Nothing can change. You can download both files again.                                               |

# Preparing the workbook

Everything about the students, groups, advisers and judges comes from one Excel workbook that your staff build. Get it right here and the rest of the evening is easy.

## READ THIS TWICE

**Your staff build their own file, starting from the app's template. Do not upload the registrar's export.** The export has the wrong columns and knows nothing about groups or advisers. If it is useful, copy names and numbers out of it into the template, one column at a time, but the file you upload is always your own.

## The workbook in one glance

| SHEET    | ONE ROW PER | COLUMNS                                                                                      |
|----------|-------------|----------------------------------------------------------------------------------------------|
| Students | student     | Student No., Surname, First Name, Middle Name, Section, Email, Group, Adviser, Adviser Email |
| Judges   | judge       | Name, Email, Password                                                                        |

There is no Groups sheet and no Advisers sheet. The groups are the different names in the Group column; the advisers are the names in the Adviser column.

## 2.1 Start from the template

### 1 Sign in, open the event, and press Download template

The **Data** tab of any event has the button (chapter 3 shows how to get there). The file saves as **Tambiz workbook template.xlsx**.

FEU Tambiz Coordinator Account

All events

TAMBIZ 2028 - OPEN FOR JUDGING

### Data

Data Judges Scoring sheet Progress Results Judge profiles Close the event

Created Tambiz 2028. Upload its workbook to begin.

#### One workbook: students and judges

An Excel workbook with two sheets. **Students:** Student No., Surname, First Name, Middle Name, Section, Email, Group, Adviser and Adviser Email, one row per student. **Judges:** Name, Email and Password, one row per judge. Groups and advisers come from the students' rows, so every row of one group must name the same adviser. Section, Middle Name, Adviser Email and Password may be left empty.

**Why there is an Adviser Email column:** each adviser gets their groups' results in the email file, and this is the only place their address can come from. An adviser without one gets no email.

Uploading adds and updates, matched on the student number, the judge's email and the group name. It never removes anyone and never changes a score. A judge with an empty Password gets one made by the app, shown once below to print; an existing judge keeps their password.

Download template Download current data Change the current data in Excel and upload it back.

Choose File No file chosen Upload workbook

No students yet

Upload your workbook above and everyone appears here. You can also type a student into the table below.

Download template

The Data tab of a new event. **Download template** is in the upper card and again in the empty table's card.

## 2 Open it and look at its three sheets

**Students** and **Judges** each have their headings and one invented example row. **How to fill this in** repeats this chapter's rules in the app's own words.

|   | A           | B         | C          | D           | E       | F                            | G            | H             | I                           |
|---|-------------|-----------|------------|-------------|---------|------------------------------|--------------|---------------|-----------------------------|
| 1 | Student No. | Surname   | First Name | Middle Name | Section | Email                        | Group        | Adviser       | Adviser Email               |
| 2 | 2027012345  | DELA CRUZ | JUAN       | SANTOS      | Sec - 1 | juan.delacruz@example.edu.ph | SAMPLE GROUP | SANTOS, MARIA | maria.santos@example.edu.ph |

Students, as downloaded. Row 2 is an invented example.

|   | A               | B                       | C        |
|---|-----------------|-------------------------|----------|
| 1 | Name            | Email                   | Password |
| 2 | Dr. Liza Manalo | liza.manalo@example.com |          |

Judges, as downloaded.

## 3 Save it under this year's name

Choose **File** → **Save As**, keep **Excel Workbook (.xlsx)**, and name it for the year.

TYPE EXACTLY THIS AS THE FILE NAME

Tambiz 2028 workbook

## What each Students column is for

| COLUMN                     | NEEDED? | WHAT GOES IN IT, AND WHAT THE APP DOES WITH IT                                                                                             |
|----------------------------|---------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Student No.</b>         | Yes     | As on the class roll. It is how the app recognises a student when you upload again.                                                        |
| <b>Surname, First Name</b> | Yes     | As on the class roll. The official grade sheet shows them as SURNAME, FIRST NAME.                                                          |
| <b>Middle Name</b>         | No      | Shown after the first name on the grade sheet.                                                                                             |
| <b>Section</b>             | No      | For example <b>Sec - 1</b> . Judging never needs it, but the For Encoding grade sheet is sorted by it.                                     |
| <b>Email</b>               | Yes     | The student's own address. Their results email goes here.                                                                                  |
| <b>Group</b>               | Yes     | The business name, for example <b>KAPE KULTURA</b> . Judges see it on their phones.                                                        |
| <b>Adviser</b>             | Yes     | The group's adviser, written as the registrar writes it: <b>SANTOS, MARIA LOURDES</b> . Every row of one group must name the same adviser. |
| <b>Adviser Email</b>       | No      | Where the adviser's results email goes. It is the only place the app can learn it. An adviser without one gets no email.                   |

## 2.2 Fill it in, a few rows at a time

Work group by group. After each step, look at your sheet and compare it with the picture.

## 4 Delete the example row

On the **Students** sheet, right-click the row number **2** and choose **Delete**. Do the same on the **Judges** sheet. Keep row 1, the headings, exactly as it is.

### IF IT GOES WRONG

Forgot? The upload adds an extra student, **DELA CRUZ, JUAN**, in a group called **SAMPLE GROUP**. Remove him on the **Data** tab: select his row and press **Remove student**. The group disappears by itself once it has nobody in it.

## 5 Type the first group: three students

One row per student. The three rows of KAPE KULTURA name the same adviser and the same adviser email.

**TYPE EXACTLY THIS, PRESSING TAB BETWEEN CELLS (FIRST ROW)**

2025010001 REYES ANDREA CRUZ Sec - 1 andrea.reyes@example.edu.ph KAPE KULTURA  
SANTOS, MARIA LOURDES mlsantos@example.edu.ph

|   | A           | B        | C          | D           | E       | F                              | G            | H                     | I                       |
|---|-------------|----------|------------|-------------|---------|--------------------------------|--------------|-----------------------|-------------------------|
| 1 | Student No. | Surname  | First Name | Middle Name | Section | Email                          | Group        | Adviser               | Adviser Email           |
| 2 | 2025010001  | REYES    | ANDREA     | CRUZ        | Sec - 1 | andrea.reyes@example.edu.ph    | KAPE KULTURA | SANTOS, MARIA LOURDES | mlsantos@example.edu.ph |
| 3 | 2025010008  | BAUTISTA | MIGUEL     |             | Sec - 1 | miguel.bautista@example.edu.ph | KAPE KULTURA | SANTOS, MARIA LOURDES | mlsantos@example.edu.ph |
| 4 | 2025010015  | GARCIA   | BEA        | LIM         | Sec - 1 | bea.garcia@example.edu.ph      | KAPE KULTURA | SANTOS, MARIA LOURDES | mlsantos@example.edu.ph |

After step 5. Miguel Bautista has no middle name: that cell is simply left empty.

## 6 Add the next two groups

BANIG & CO. has the same adviser as KAPE KULTURA, which is fine: an adviser may have several groups. SARI-SARI SMART has a different one.

|    | A           | B        | C          | D           | E       | F                              | G               | H                     | I                         |
|----|-------------|----------|------------|-------------|---------|--------------------------------|-----------------|-----------------------|---------------------------|
| 1  | Student No. | Surname  | First Name | Middle Name | Section | Email                          | Group           | Adviser               | Adviser Email             |
| 2  | 2025010001  | REYES    | ANDREA     | CRUZ        | Sec - 1 | andrea.reyes@example.edu.ph    | KAPE KULTURA    | SANTOS, MARIA LOURDES | mlsantos@example.edu.ph   |
| 3  | 2025010008  | BAUTISTA | MIGUEL     |             | Sec - 1 | miguel.bautista@example.edu.ph | KAPE KULTURA    | SANTOS, MARIA LOURDES | mlsantos@example.edu.ph   |
| 4  | 2025010015  | GARCIA   | BEA        | LIM         | Sec - 1 | bea.garcia@example.edu.ph      | KAPE KULTURA    | SANTOS, MARIA LOURDES | mlsantos@example.edu.ph   |
| 5  | 2025010022  | MENDOZA  | JOSHUA     | TAN         | Sec - 1 | joshua.mendoza@example.edu.ph  | BANIG & CO.     | SANTOS, MARIA LOURDES | mlsantos@example.edu.ph   |
| 6  | 2025010029  | AQUINO   | KRISTINE   |             | Sec - 1 | kristine.aquino@example.edu.ph | BANIG & CO.     | SANTOS, MARIA LOURDES | mlsantos@example.edu.ph   |

| 8  | 2025010043  | CASTILLO | NICOLE     | SY          | Sec - 1 | nicole.castillo@example.edu.ph | SARI-SARI SMART | VILLAREAL, RAMON      | rvillareal@example.edu.ph |
| 9  | 2025010050  | TORRES   | CARLO      |             | Sec - 1 | carlo.torres@example.edu.ph    | SARI-SARI SMART | VILLAREAL, RAMON      | rvillareal@example.edu.ph |
| 10 | 2025010057  | FLORES   | PATRICIA   | ONG         | Sec - 1 | patricia.flores@example.edu.ph | SARI-SARI SMART | VILLAREAL, RAMON      | rvillareal@example.edu.ph |

After step 6: three groups, nine students, two advisers.

## 7 Add the rest, one group at a time

Here, three more groups in Sec - 2. OCAMPO, DANILO's email is not known yet, so his Adviser Email cells are left empty for now.

|    | A           | B        | C          | D           | E       | F                                | G               | H                     | I                         |

After step 7: six groups, eighteen students, four advisers. Chapter 6 adds Mr Ocampo's email in the app.

### IF IT GOES WRONG

**Student numbers that start with 0.** Excel drops a leading zero from a number. If your numbers can start with 0, select column A and choose **Format Cells** → **Text** before typing any. Numbers starting 20... are not affected.

## 8 Type the judges on the Judges sheet

Name as the judges will see it, and the email they will sign in with. Leave **Password** empty: the app makes a password for each new judge and shows it once, on a slip to print (chapter 3).

|   | A                | B                       | C               |
|---|------------------|-------------------------|-----------------|
| 1 | <b>Name</b>      | <b>Email</b>            | <b>Password</b> |
| 2 | Dr. Liza Manalo  | liza.manalo@example.com |                 |
| 3 | Mr. Paolo Dizon  | paolo.dizon@example.com |                 |
| 4 | Ms. Carmela Yap  | carmela.yap@example.com |                 |
| 5 | Engr. Ramon Cruz | ramon.cruz@example.com  |                 |

Four judges, passwords left empty.

## 9 Save

Press **Ctrl+S** (⌘S on a Mac). If Excel asks about the format, keep **Excel Workbook (.xlsx)**. A .xls or .csv file is refused.

# 2.3 Check it before you upload

Five formulas, typed once to the right of the data, catch the mistakes that matter. The app ignores any column it does not know, so they can stay in the file when you upload it.

## 10 Type the five headings in K1 to O1

TYPE EXACTLY THIS IN K1, L1, M1, N1 AND O1

BLANK      TWICE      CHECK EMAIL      ADVISER DIFFERS      CHECK SECTION

## 11 List your real sections in column Q

Type **Sections** in Q1, then each section exactly as it should be written, one per cell from Q2: **Sec - 1**, **Sec - 2**, and so on.

## 12 Type the five formulas in row 2

K2 · A REQUIRED CELL IS EMPTY

=IF(OR(A2="",B2="",C2="",F2="",G2="",H2=""),"BLANK","")

L2 · THE SAME STUDENT NUMBER TWICE

=IF(COUNTIF(\$A\$2:\$A\$500,A2)>1,"TWICE","")

M2 · AN EMAIL WITH NO @

=IF(ISNUMBER(SEARCH("@",F2)),"","CHECK EMAIL")

N2 · ROWS OF ONE GROUP NAMING DIFFERENT ADVISERS

=IF(COUNTIFS(\$G\$2:\$G\$500,G2,\$H\$2:\$H\$500,H2)<COUNTIF(\$G\$2:\$G\$500,G2),"ADVISER DIFFERS","")

O2 · A SECTION NOT ON YOUR LIST

=IF(COUNTIF(\$Q\$2:\$Q\$20,E2)=0,"CHECK SECTION","")

### 13 Copy K2:O2 down to the last student

Select K2 to O2, then double-click the small square at the bottom right of the selection. Any flag that appears marks a row to fix.

|    | A           | E       | F                              | G               | H                     | K     | L     | M           | N               | O             | Q        |

The real file after fixing: every check column is empty.

### What the app does with each mistake, if you upload it anyway

| FLAG            | WHAT THE UPLOAD DOES                                                                                                                     |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------|
| BLANK           | Skips the row and says so, for example "Students row 12 has no Email, so it was skipped."                                                |
| TWICE           | Keeps only the later of the two rows, and says so. The student on the earlier row is left out until you fix the number and upload again. |
| CHECK EMAIL     | Skips the row: "Students row 6: "kristine.aquino.example.edu.ph" is not an email address, so the row was skipped."                       |
| ADVISER DIFFERS | Refuses the <b>whole group</b> and names the rows (chapter 3, step 10). Everybody else is uploaded.                                      |
| CHECK SECTION   | <b>Nothing: it uploads silently.</b> The student is sorted under the misspelt section on the grade sheet.                                |

#### READ THIS TWICE: TWO MISTAKES THE APP CANNOT SEE

**A wrong email and a wrong section upload silently.** The app checks only that an email looks like one (something@something.something). `andrea.reyez@example.edu.ph` looks fine, uploads fine, and sends Andrea's grade to nobody, or to somebody else. A section written **Sec 2** instead of **Sec - 2** becomes a section of its own. Formulas cannot catch a real-looking wrong address: have a second person read the Email column against the class roll before you upload, and fix any mistake later directly in the Data table (chapter 3).

# Setting up

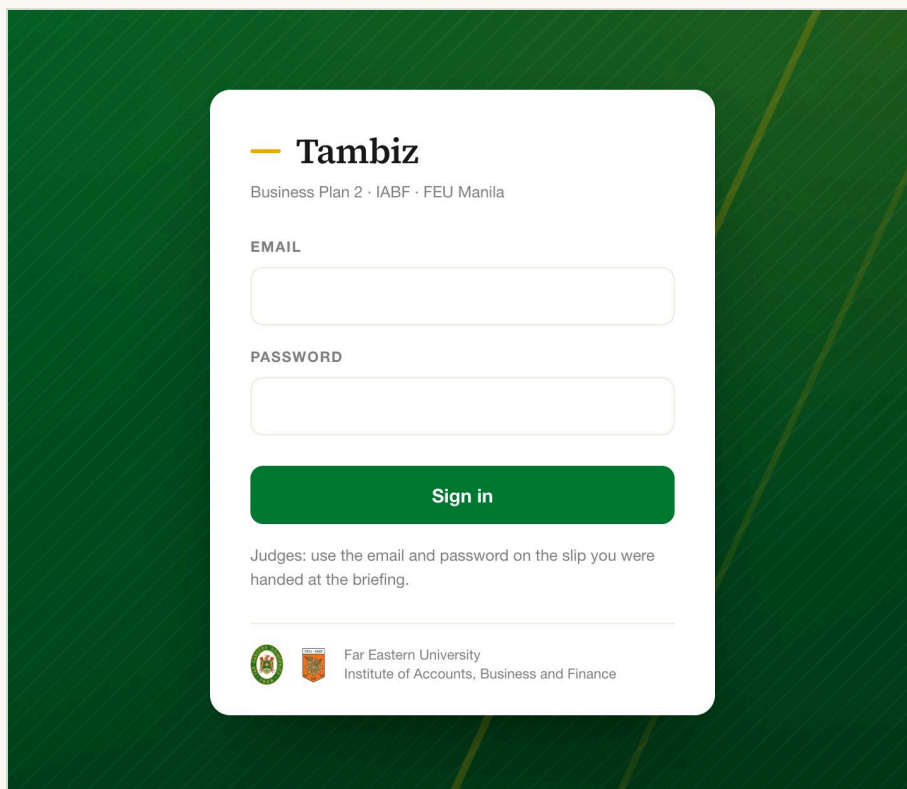

From signing in to judges holding their slips. About an hour, most of it checking.

## 3.1 Sign in

### 1 Open the app's address on a laptop

TYPE EXACTLY THIS INTO THE ADDRESS BAR

tambiz-calculator-lyart.vercel.app

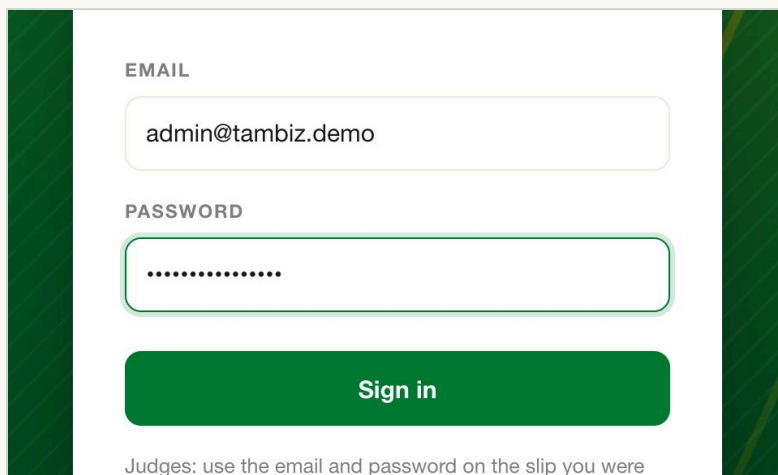

The sign-in card, the same for you and for the judges.

#### IF IT GOES WRONG

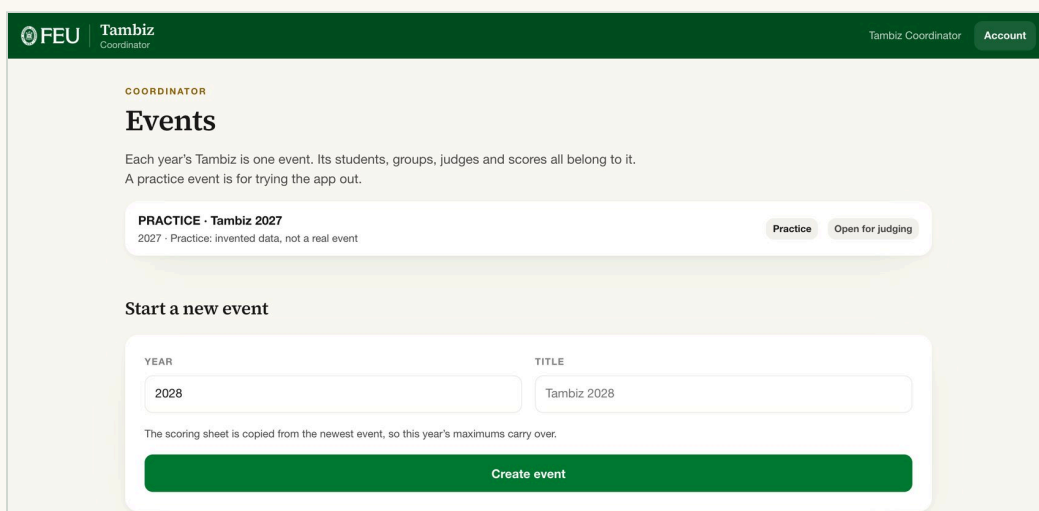

The first page of the day can take a few seconds while the database wakes up. Wait; do not press again. Chapter 9.7 covers a site that does not load at all.

## 2 Type the coordinator email and password, and press Sign in

The coordinator login is **admin@tambiz.demo**. The password is kept where chapter 9.2 says.

A login form with a green header bar. It contains two input fields: 'EMAIL' with the text 'admin@tambiz.demo' and 'PASSWORD' with masked characters. Below the fields is a green 'Sign in' button. At the bottom, a note says 'Judges: use the email and password on the slip you were'.

The 'Events' page for a coordinator. It features a green header with 'FEU Tambiz Coordinator' and 'Tambiz Coordinator Account'. The main content area has a title 'Events' and a description: 'Each year's Tambiz is one event. Its students, groups, judges and scores all belong to it. A practice event is for trying the app out.' Below this is a card for 'PRACTICE - Tambiz 2027' with a note '2027 - Practice: invented data, not a real event' and buttons for 'Practice' and 'Open for judging'. A section 'Start a new event' contains input fields for 'YEAR' (2028) and 'TITLE' (Tambiz 2028), a note 'The scoring sheet is copied from the newest event, so this year's maximums carry over.', and a green 'Create event' button.

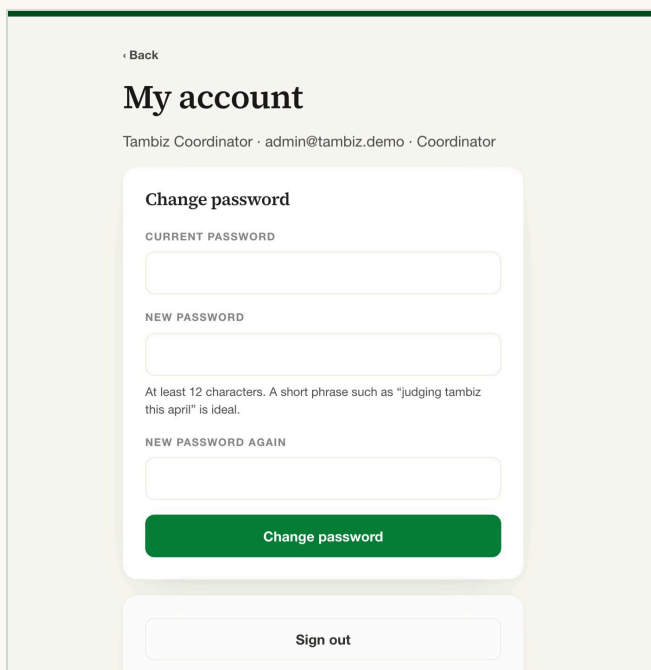

You land on **Events**. A fresh app has only the practice event.

### IF IT GOES WRONG

**Sign-in failed. Check your email and password.** Check for a capital letter or a space the keyboard added. After three wrong tries the app makes you wait, 10 seconds and doubling up to 5 minutes, and says **Too many attempts. Wait ... seconds, then try again.** A forgotten coordinator password: chapter 9.4.

### 3 If this is a new app, change the sample password: **Account** → **Change password**

Press **Account** at the top right. Type the current password, then the new one twice, at least 12 characters, and press **Change password**.

The screenshot shows a web interface for 'My account'. At the top, there is a 'Back' link. Below it, the title 'My account' is displayed, followed by the user's role and email: 'Tambiz Coordinator · admin@tambiz.demo · Coordinator'. The main content is a 'Change password' form. It has three input fields: 'CURRENT PASSWORD', 'NEW PASSWORD', and 'NEW PASSWORD AGAIN'. Below the 'NEW PASSWORD' field, there is a note: 'At least 12 characters. A short phrase such as "judging tambiz this april" is ideal.' At the bottom of the form is a green button labeled 'Change password'. Below the form is a 'Sign out' button.

#### IF IT GOES WRONG

If your new password stops working after a day and the old one works again, the site is putting a password back every time it starts. That is the **SEED\_ADMIN\_PASSWORD** setting in chapter 9.4.

## 3.2 Create this year's event

### 4 Under **Start a new event**, check the **Year** and leave **Title** empty

The year box already shows next year. Leave **Title** empty and the event is called "Tambiz" and the year.

### 5 Press **Create event**

You land on the new event's **Data** tab, with the green message **Created Tambiz 2028. Upload its workbook to begin.** (pictured in chapter 2, step 1). The seven tabs along the top are the whole app: **Data**, **Judges**, **Scoring sheet**, **Progress**, **Results**, **Judge profiles**, **Close the event**.

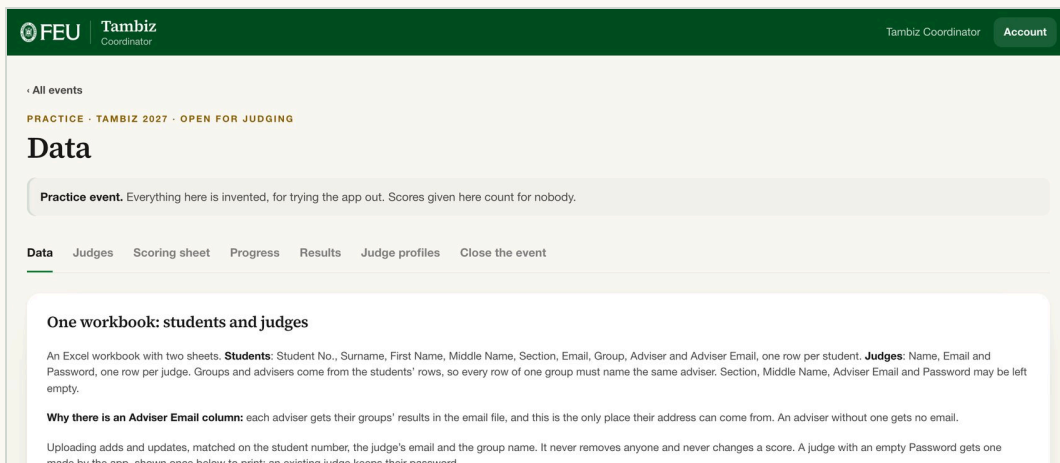

The new event copies its scoring sheet, points and criterion wording from the newest existing event.

#### IF IT GOES WRONG

Made it with the wrong year? There is no delete button. Leave it empty and create the right one; an event with nobody in it does no harm. Never put this year's students into last year's event.

### The practice event

Every screen of the practice event carries a shaded **Practice event** bar. Everything in it is invented, and it is where you rehearse (chapter 9.6). Never score a real group in it.

"Practice event. Everything here is invented, for trying the app out. Scores given here count for nobody."

## 3.3 The scoring sheet wording

Judges see each criterion's wording on their phones. Without it the rows read "Criterion 1, Criterion 2...". Wording never changes a score, so this can be done at any time, even during judging.

### 6 Press the Scoring sheet tab

Each category is a card with one box per criterion; the points for each criterion are printed beside its box, for example /20.

### 7 Copy the 39 criteria from Word or Excel, one per line, and paste into the first box

In sheet order: the 21 Defense criteria, then the 18 Booth criteria. Click the first box under **Elevator Pitch** and press **Ctrl+V**. Each line fills the next box, carrying on into the next category; numbers and bullets at the start of a line are removed.

After pasting. The bar at the bottom says **Filled 39 boxes from your paste. Check them, then press Save wording.**

### 8 Check the last box of each category against your list

A line too many or too few pushes everything after it one box along. The last box of each category shows it at once.

## 9 Press Save wording

All events

TAMBIZ 2028 · OPEN FOR JUDGING

Judge profiles

Close the event

Wording saved: 39 of 39 criteria have wording. Judges see it the next time they open a group.

Type what each criterion is. Judges see this wording on their phones in place of "Criterion 1, Criterion 2". The points beside each box stay as they are, and changing the wording never changes a score, so you can do it at any time.

To paste a whole list: copy the criteria from Word or Excel, one per line and in order, then paste into the first box. Each line fills the next box, carrying on into the next category. Numbers and bullets at the start of a line are removed. Check the boxes, then press **Save wording**.

Overall = Defense × 0.7 + Booth × 0.3. Members: Presentation /20, Communication /40, Q&A /40. Points, weights and letter bands cannot be changed on screen.

Wording saved: 39 of 39 criteria have wording. Judges see it the next time they open a group.

## 3.4 Upload the workbook

### 10 On the Data tab, press Choose File and pick your workbook

Created Tambiz 2028. Upload its workbook to begin.

One workbook: students and judges

An Excel workbook with two sheets. **Students:** Student No., Surname, First Name, Middle Name, Section, Email, Group, Adviser and Adviser Email, one row per student. **Judges:** Name, Email and Password, one row per judge. Groups and advisers come from the students' rows, so every row of one group must name the same adviser. Section, Middle Name, Adviser Email and Password may be left empty.

**Why there is an Adviser Email column:** each adviser gets their groups' results in the email file, and this is the only place their address can come from. An adviser without one gets no email.

Uploading adds and updates, matched on the student number, the judge's email and the group name. It never removes anyone and never changes a score. A judge with an empty Password gets one made by the app, shown once below to print; an existing judge keeps their password.

Checking 18 students

8 of 22 rows

Checking 18 students · 8 of 22 rows: 18 students and 4 judges make 22 rows.

## 12 Read the green message, and the shaded box under it

The green message says what changed. The shaded box lists anything in the file that was not taken, and why. This first try had one mistake left in it: a group whose rows named two different advisers.

Uploaded Tambiz 2028 workbook.xlsx: 15 new students, 5 new groups, 3 new advisers, 4 new judges. No one was removed and no score changed.

**1 thing to check in the file:**

- Group TAHANAN TILES was not imported: its rows name different advisers (rows 14 and 16 say UY, TERESITA; row 15 says UY, TERESA). A group has one adviser, so every row of TAHANAN TILES must name the same one. Correct the rows and upload again; nothing else about TAHANAN TILES changed.

**Print or write these down now.** These 4 passwords are shown only here, once. The app keeps no copy it can show again; if a slip is lost, use **Reset password** on the Judges tab.

**Tambiz 2028: judges' sign-in**

Open the Tambiz app on your phone and sign in with your email and password.

| JUDGE            | EMAIL                   | PASSWORD                    |
|------------------|-------------------------|-----------------------------|
| Dr. Liza Manalo  | liza.manalo@example.com | tinapay-ube-5876-kape       |
| Engr. Ramon Cruz | ramon.cruz@example.com  | jeep-pandan-3307-halo       |
| Mr. Paolo Dizon  | paolo.dizon@example.com | kalamansi-pandan-2429-abaca |
| Ms. Carmela Yap  | carmela.yap@example.com | niyog-tsinelas-2397-tinapay |

[Print this list](#)

Uploaded Tambiz 2028 workbook.xlsx: 15 new students, 5 new groups, 3 new advisers, 4 new judges. No one was removed and no score changed. Below it: **Group TAHANAN TILES was not imported: its rows name different advisers (rows 14 and 16 say UY, TERESITA; row 15 says UY, TERESA).** Then the judges' sign-in list.

## 13 Print the sign-in list now: press **Print this list**

It lists each new judge's name, email and password, laid out to fit one page. Cut it into slips for the judges' briefing.

### READ THIS TWICE

**The passwords are shown only this once.** The app keeps no copy it can show again. If you leave the page without printing, or a slip is lost, give that judge a new password with **Reset password** on the Judges tab (chapter 9.4).

## 14 Fix what the shaded box names, save, and upload the same file again

Uploading twice never adds anyone twice: students are matched on Student No., judges on email, groups on name. Judges already in the app keep their passwords.

Uploaded Tambiz 2028 workbook.xlsx: 3 new students, 1 new group, 1 new adviser. No one was removed and no score changed.

18 students in 6 groups with 4 advisers · 1 adviser without an email.

Uploaded Tambiz 2028 workbook.xlsx: 3 new students, 1 new group, 1 new adviser. No one was removed and no score changed. The line under it counts **18 students in 6 groups with 4 advisers · 1 adviser without an email.**

### IF IT GOES WRONG

This does not look like an Excel .xlsx file. Open it in Excel, **Save As** → **Excel Workbook (.xlsx)**, and upload that. **The Students sheet has no "Email" column.** A heading was renamed: copy row 1 from a fresh template. Nothing is saved when a file is refused.

## What an upload never does

- **It never removes anybody.** A student or judge missing from the file stays in the app. Remove them on the Data or Judges tab.
- **It never touches a score**, before, during or after judging.
- It is refused while the event is closed.

## 3.5 The Data table

Every list in the app is the same table, and it works like Excel. There is no Save button: every change saves itself, and the label at the top right says **All changes saved**, **Saving...**, or in red how many cells were refused.

| TO                                        | DO THIS                                                                                                                                                           |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Change a detail                           | Click the cell, type over it, press <b>Enter</b> . <b>Esc</b> throws away what you typed.                                                                         |
| Paste from Excel                          | Copy the cells in Excel, click where the top-left one should go, <b>Ctrl+V</b> . A bar says how many cells will change; <b>Enter</b> applies, <b>Esc</b> cancels. |
| Move a student to another group           | Type the group's name in their <b>Group</b> cell. The cell completes the name as you type; <b>Enter</b> or <b>Tab</b> accepts.                                    |
| Change a group's adviser or adviser email | Type it on any one row of the group; every member's row follows.                                                                                                  |
| Add a student                             | Type in the empty last row, <b>Add a student here</b> .                                                                                                           |
| Remove a student                          | Select the row and press <b>Remove student</b> (or <b>Ctrl+Delete</b> , then <b>Enter</b> ). A student the judges have already scored cannot be removed.          |
| Find someone                              | <b>Ctrl+F</b> or the <b>Search</b> box; the lists beside it filter by Section, Group or Adviser. Click a heading to sort.                                         |

## 3.6 The Judges tab

It lists this event's judges. Most came in with the workbook. To add one more, type their name and email in the last row, **Add a judge here**; a sign-in list with their password appears above the table, once, to print.

FEU Tambiz Coordinator

Tambiz Coordinator Account

TAMBIZ 2028 · OPEN FOR JUDGING

Judges

Data Judges Scoring sheet Progress Results Judge profiles Close the event

The judges of Tambiz 2028. Most come in with the workbook on the Data tab. To add one here, type their name and email in the last row.

Sign-in list. A new judge's password is shown once, on a list laid out to print on one page and hand out at the briefing. The app keeps no copy of a password it can show again, so print the list when it appears: straight after the upload on the Data tab, or here after adding a judge. If a judge loses their slip, select them and press **Reset password**: a new password is shown once in the same way and the old one stops working. Typing the email of a judge from an earlier year adds that account instead, with its password unchanged.

Search judges 4 rows All changes saved

Select a row first Reset password Remove from this event (Ctrl+Delete)

| NAME AS JUDGES SEE IT | EMAIL                   | PROFILE |
|-----------------------|-------------------------|---------|
| Dr. Liza Manalo       | liza.manalo@example.com | Profile |
| Engr. Ramon Cruz      | ramon.cruz@example.com  | Profile |
| Mr. Paolo Dizon       | paolo.dizon@example.com | Profile |

The four judges of Tambiz 2028. **Profile** opens that judge's page in Judge profiles. **Reset password** and **Remove from this event** work on the selected row (chapter 9.4).

Typing the email of a judge from an earlier year adds that same account, with its password unchanged, so their judge profile carries on.

## 3.7 Opening judging

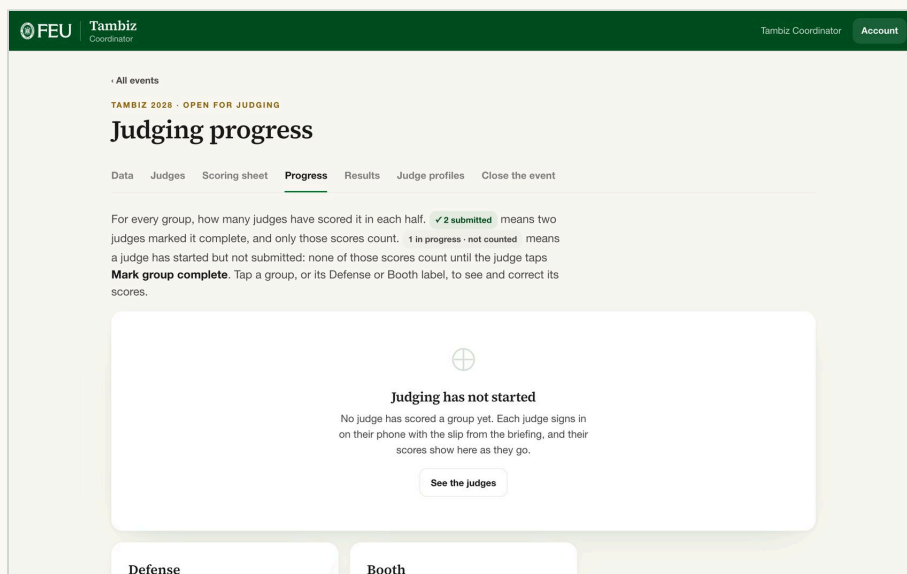

There is no button to press. **An event is open for judging from the moment it is created**, and a judge can score as soon as they are on it. What opens judging in practice is the slips in the judges' hands.

### 15 Hand each judge their slip at the briefing

### 16 Ask every judge to open the address on their phone and sign in once, before the night

A phone that has never opened the app cannot load it with no connection. After one visit, scores typed offline are kept on the phone and sent later (chapter 5).

### 17 Open the Progress tab: it should say Judging has not started

Before any score arrives. From the first submitted sheet on, this page fills in (chapter 6).

# How a score becomes a grade

One student, Andrea Reyes of KAPE KULTURA, followed from the judges' scores to her letter grade. Every number is from the Tambiz 2028 pictures in this manual.

|                                                                                       |   |                                                                     |   |                                                        |   |                                                                     |   |                                                                                              |

## 4.1 The group's score

### Step A · One category: Elevator Pitch

Two defense judges submitted a sheet for KAPE KULTURA: Dr. Liza Manalo and Mr. Paolo Dizon. For each criterion the app takes the average of their two scores.

| REASON FOR THESE CORRECTIONS                                                                                                                                                             |                                                      |     |                             |                             |                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|-----|-----------------------------|-----------------------------|----------------------|
| Judge confirmed 16, typed 0                                                                                                                                                              |                                                      |     |                             |                             |                      |
| Corrected Elevator Pitch 4 (The pitch closes with a clear ask) for Dr. Liza Manalo: 0 $\rightarrow$ 16. The judge's own score is kept and your reason is recorded. <a href="#">Close</a> |                                                      |     |                             |                             |                      |

| Infomercial                                                                                                                                                                              | 1. The message is clear and memorable                | 10  | 8                           | 8.5                         | 8.25                 |

KAPE KULTURA's Defense scores (Progress  $\rightarrow$  the group's name). Criterion 4 is shaded: Dr. Manalo typed 0 and the coordinator corrected it to 16 with a reason (chapter 6).

| CRITERION                             | MAX        | DR. MANALO     | MR. DIZON | AVERAGE                                      |
|---------------------------------------|------------|----------------|-----------|----------------------------------------------|
| 1. The problem is stated clearly...   | 20         | 17             | 16        | 16.50                                        |
| 2. The customer and market...         | 20         | 18             | 16        | 17.00                                        |
| 3. The product answers the problem... | 20         | 18             | 16.5      | 17.25                                        |
| 4. The pitch closes with a clear ask  | 20         | 16 (corrected) | 16.5      | 16.25                                        |
| 5. Delivery is confident...           | 20         | 16.5           | 17        | 16.75                                        |
| <b>Elevator Pitch</b>                 | <b>100</b> |                |           | <b>83.75 <math>\rightarrow</math> 83.75%</b> |

Averages added up: 83.75 out of 100 points, so 83.75%. A category's percentage uses only criteria that have at least one score, so a blank criterion is left out rather than counted as zero.

### Step B · The two halves

Defense = (Elevator Pitch 83.75 + Infomercial 81.25 + Paper 81.50 + Product Demo 83.25)  $\div 4$  = **82.44%**  
Booth = (Best Business Plan Booth 85.50 + Student Innovation 88.50 + Best Product Demonstration 89.00)  $\div 3$  = **87.67%**

Every category weighs the same within its half. Infomercial is out of 40 points, not 100, but its percentage counts the same as the others'.

## Step C · The group overall

Overall = Defense × 0.7 + Booth × 0.3 = 82.4375 × 0.7 + 87.6667 × 0.3 = 57.71 + 26.30 = **84.01%**

The app carries the halves unrounded until the end; working with the two-decimal figures gives the same 84.01. Every student of KAPE KULTURA shares this number.

**Every group**

Each category shows the percentage and, after the dot, its rank. Click a heading (or use Sort on a phone) to sort by any column; search, or filter by adviser or by whether the group is fully judged. Press a group's name to see its scores.

Arrow keys move · Ctrl+C copies · Ctrl+F searches · click a heading to sort

Results → Every group. Each category shows its percentage and, after the dot, its rank. The table scrolls sideways inside its frame: KAPE KULTURA's **Overall 84.01** and **Rank 2** are in the columns to the right of this picture, and in the workbook's Results sheet (chapter 7.4).

## 4.2 The student's own score

### Step D · The member total

In the Defense, each judge also scores every student: Presentation /20, Communication /40, Q&A /40. For each of the three, the app averages the judges who scored it, then adds the three averages.

| ANDREA REYES        | MAX        | DR. MANALO | MR. DIZON | AVERAGE      |
|---------------------|------------|------------|-----------|--------------|
| Presentation        | 20         | 18         | 17        | 17.50        |
| Communication       | 40         | 35         | 32.5      | 33.75        |
| Q&A                 | 40         | 34         | 32        | 33.00        |
| <b>Member total</b> | <b>100</b> |            |           | <b>84.25</b> |

Until every one of the three has at least one judge's score, there is no member total and no grade; a partial total is never scaled up.

### Step E · The final grade

Final grade = (Member total 84.25 + Group overall 84.01) ÷ 2 = 168.26 ÷ 2 = **84.13**

Step F · Round up, then the FEU letter band

84.13 rounded **up** to a whole number = **85** → 85 is in 85–91 → **B+**, 3.5 quality points

| ROUNDED GRADE  | 92–100 | 85–91      | 78–84 | 71–77 | 64–70 | 57–63 | 50–56 | 0–49 |
|----------------|--------|------------|-------|-------|-------|-------|-------|------|
| Letter         | A      | <b>B+</b>  | B     | C+    | C     | D+    | D     | F    |
| Quality points | 4      | <b>3.5</b> | 3     | 2.5   | 2     | 1.5   | 1     | 0    |

**READ THIS TWICE**  
**The grade is always rounded up.** Andrea's 84.13 becomes 85, a B+; rounded the ordinary way it would have been 84, a B. Any fraction at all goes up: 84.01 becomes 85 too.

|            |                       |         |                 |                       |       |       |       |    |    |     |         |       |

REYES, ANDREA CRUZ · Member total: Dr. Liza Manalo: 18 / 35 / 34 · Mr. Paolo Dizon: 17 / 32.5 / 32

Type to change a cell · Enter moves down, Tab moves right · F2 edits the text · Ctrl+V pastes from Excel · Ctrl+F searches · click a heading to sort

Results → Individual grades, with Andrea's **Member total** cell selected. The line under the table shows each judge's three scores: **Dr. Liza Manalo: 18 / 35 / 34 · Mr. Paolo Dizon: 17 / 32.5 / 32.**

4.3 The rules that decide the numbers

| RULE                                 | WHAT IT MEANS                                                                                                                                                                                                                                 |
|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Only submitted sheets count          | A sheet the judge never marked complete is ignored everywhere. Mr. Dizon started HALO-HALO HUB's defense and never submitted it, so HALO-HALO HUB's defense rests on Dr. Manalo's sheet alone.                                                |
| A blank is never a zero              | A criterion, category or half nobody scored is left out. A group with no booth score at all has its defense as its overall.                                                                                                                   |
| Incomplete groups are not ranked     | Until every criterion in both halves has a score on a submitted sheet, a group reads <b>Incomplete</b> , with no rank and no place on the leaderboard.                                                                                        |
| Two decimals, one rounding           | Every percentage shows two decimals; the screens and the workbook round the same way, so they always agree.                                                                                                                                   |
| Ties go to the higher overall        | In Infomercial, SARI-SARI SMART and BANIG & CO. both show 78.13%. SARI-SARI SMART's overall (81.81) is higher than BANIG & CO.'s (78.60), so it ranks 3rd and BANIG & CO. 4th. Two groups share a place only if their overalls are equal too. |
| Absent means zero                    | A student marked absent from the defense has zero for every individual score nobody gave, and a grade worked out as usual (below).                                                                                                            |
| Scores above the maximum are refused | Never quietly changed to the maximum. The judge's phone refuses them, and so does the server.                                                                                                                                                 |

### An absent student

Kristine Aquino of BANIG & CO. missed the defense and was marked absent. Her member total is 0, so her final grade is  $(0 + 78.60) \div 2 = 39.30$ , rounded up to 40: **F**. That is the department's rule, applied exactly. If the department decides otherwise for a student, type their individual scores on the group's scores page with a reason (chapter 6); the grade, the workbook and the email follow.

### Checking a grade by hand in Excel

With the member total in A1 and the group overall in B1:

TYPE EXACTLY THIS IN C1

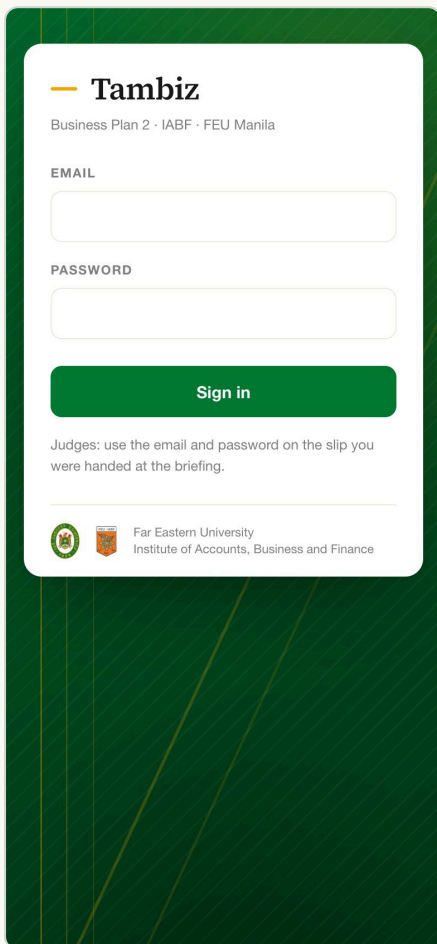

```
=ROUNDUP ( (ROUND (A1, 2) +ROUND (B1, 2) ) /2, 0)
```

Then read the letter from the band table above. For Andrea: A1 84.25, B1 84.01, C1 85, B+.

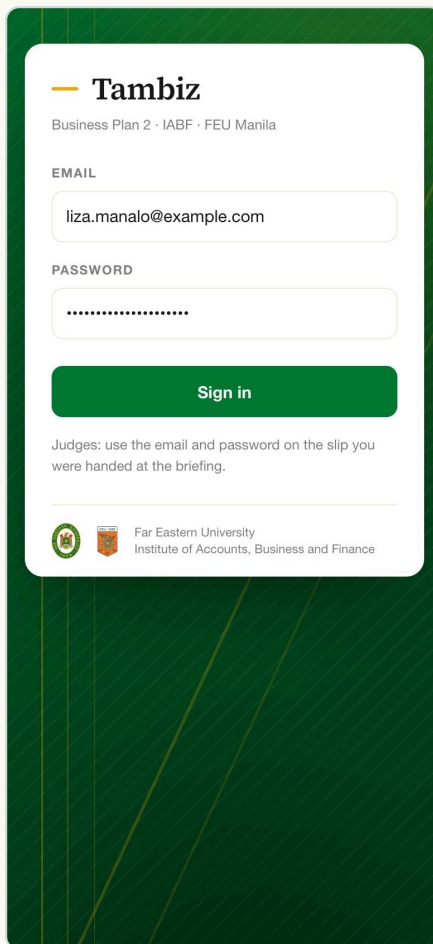

# The judge's side, click by click

Everything a judge sees, on a phone. Photocopy this chapter for the judges' briefing. The pictures follow Dr. Liza Manalo scoring KAPE KULTURA's defense.

- 1 **Open the address on your phone, type the email and password from your slip, and tap Sign in**

The sign-in card.

Email and password from the slip.

## IF IT GOES WRONG

**Sign-in failed. Check your email and password.** Phones often add a capital letter or a space at the start: check both. After three wrong tries the phone says **Too many attempts. Wait 8 seconds, then try again.** Wait, then try once more carefully. Still stuck: ask the coordinator for a new password.

## 2 At the top, tap Defense or Booth, whichever you are judging

The list shows every group, with its adviser and whether you have started it. You can search by group or adviser.

Tap **Booth** to switch.

### 3 Tap the group in front of you, and check its name at the top

You start on the first category. Each row has its number, the criterion, a large box, and the maximum beside it, for example **/20**. The label at the top right says whether your scores are saved.

The screenshot shows the FEU Tambiz 2028 Judge scoring interface. At the top, it says "FEU Tambiz 2028 Judge scoring" and "All saved". Below this, the group name "KAPE KULTURA" is displayed under the "DEFENSE" category. The interface shows three categories: "Elevator Pitch" (0/5), "Infomercial" (0/4), and "Paper" (0/9). The "Elevator Pitch" category is selected, showing "STEP 1 OF 6". The category name "Elevator Pitch" is displayed, along with the score "0 / 100" and "5 criteria - 100 points" and "0 of 5 scored". The criteria are listed as follows:

| Criteria                                            | Score |
|-----------------------------------------------------|-------|
| 1 The problem is stated clearly in the first minute | — /20 |
| 2 The customer and market are named precisely       | — /20 |
| 3 The product answers the problem convincingly      | — /20 |
| 4 The pitch closes with a clear ask                 | — /20 |
| 5 Delivery is confident and within time             | — /20 |

At the bottom, there are buttons for "Back" and "Infomercial".

KAPE KULTURA, **DEFENSE**, step 1 of 6: Elevator Pitch. The strip under the name shows every category with how many of its criteria you have scored; tap one to jump to it.

The six steps of a defense are the four categories, then **Members**, then **Review**. A booth has its three categories, then Review.

4 Tap the first box and type the score; tap Next on the keypad for the next box

Scores can have up to two decimals, for example **16.5** or **8.75**. There is no Save button: every score is kept on the phone the moment it is typed, and sent in the background.

Step 2 of 6: Infomercial, out of 40. Elevator Pitch has its tick.

## 7 If the connection drops, keep scoring

The label counts the scores kept on the phone, and they send by themselves when the connection is back. Do not close the browser, use a private tab, or clear the browser while scores are waiting.

The screenshot shows the FEU Judge scoring app interface. At the top, the status is 'Offline - 3 kept on phone'. The group is 'SANTOS, MARIA LOURDES' and the category is 'KAPE KULTURA'. The current step is 'STEP 3 OF 6' for 'Paper' with a score of '29 / 100' (3 of 9 scored). A message states: 'No connection. Keep scoring. 3 scores saved on this phone and will send by themselves when you are back online.' The criteria list includes: 1 Executive summary (4/5), 2 Market study and target market (17/20), 3 Marketing plan (8/10), 4 Operations plan (—/10), 5 Management and organisation (—/10), 6 Financial projections (—/10), and 7 Risk and contingency (—/10). Navigation buttons for 'Infomercial' and 'Product Demo' are at the bottom.

Offline · 3 kept on phone, and a note: **No connection. Keep scoring.**

The screenshot shows the same FEU Judge scoring app interface, but the status is now 'All saved'. The score remains '29 / 100' (3 of 9 scored). The criteria list is now complete: 1 Executive summary (4/5), 2 Market study and target market (17/20), 3 Marketing plan (8/10), 4 Operations plan (—/10), 5 Management and organisation (—/10), 6 Financial projections (—/10), 7 Risk and contingency (—/10), and 8 Social and environmental responsibility (—/10). The navigation buttons remain at the bottom.

Connection back: **All saved**, with nothing to press.

### IF IT GOES WRONG

The label says **Sign in to send 3**: the phone was signed out while scores were waiting. Tap **Sign in again** in the message at the top, sign in, and open the same group; the kept scores send.

## 8 Defense only: on Members, score every student

BANIG & CO.: **Absent from the defense. No scores needed: their individual scores count as zero.** Every judge and the coordinator see it. **Not absent** undoes it.

### READ THIS TWICE

Absent means a zero for that student's own scores, and usually a failing grade (chapter 4). Mark it only when the student really was not there.

## 10 Tap Review, and tap Go beside anything it lists

Review shows your percentage for each category, every blank box and every zero. **Go** jumps straight to that box.

**Go** opened Paper with the blank box ready to type in.

## 11 When nothing is blank or red, tap Mark group complete

The screenshot shows the 'REVIEW · DEFENSE' section for the group 'KAPE KULTURA'. The interface includes a header with 'FEU Tambiz 2028 Judge scoring' and 'All saved'. Below the header, there are tabs for 'Groups', 'Product Demo', 'Members', and 'Review'. The 'Review' tab is active, showing a list of items with their scores: Elevator Pitch (69.50%), Infomercial (80.00%), Paper (82.00%), Product Demo (87.00%), and Members (3 of 3 fully scored). A green button labeled 'Mark group complete' is visible at the bottom of the list, with the text 'Everything is filled in.' below it.

| Item           | Score               |
|----------------|---------------------|
| Elevator Pitch | 69.50%              |
| Infomercial    | 80.00%              |
| Paper          | 82.00%              |
| Product Demo   | 87.00%              |
| Members        | 3 of 3 fully scored |

Everything is filled in. The button is green.

The screenshot shows the 'REVIEW · DEFENSE' section for the group 'KAPE KULTURA'. The interface includes a header with 'FEU Tambiz 2028 Judge scoring' and 'All saved'. Below the header, there are tabs for 'Groups', 'Product Demo', 'Members', and 'Review'. The 'Review' tab is active, showing a list of items with their scores: Elevator Pitch (69.50%), Infomercial (80.00%), Paper (82.00%), Product Demo (87.00%), and Members (3 of 3 fully scored). A green message box at the top of the list states 'Marked complete. Scores are locked against accidental taps.' with an 'Edit scores' button. Below the list, there are buttons for 'Members' and 'All groups'.

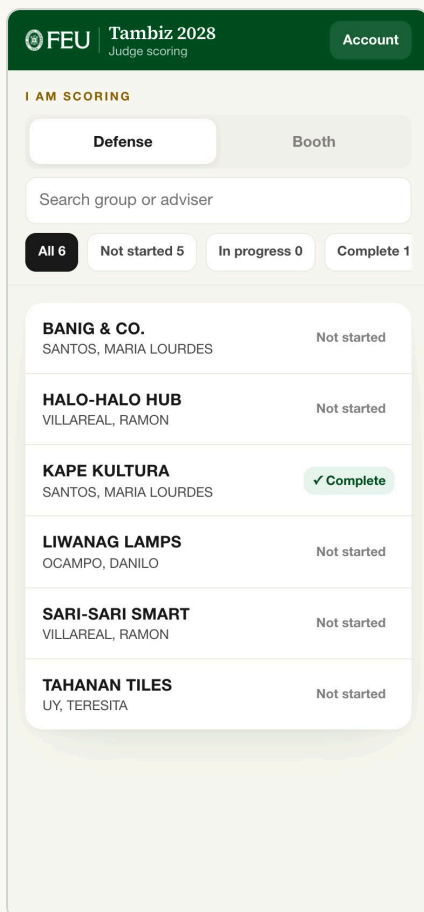

| Item           | Score               |
|----------------|---------------------|
| Elevator Pitch | 69.50%              |
| Infomercial    | 80.00%              |
| Paper          | 82.00%              |
| Product Demo   | 87.00%              |
| Members        | 3 of 3 fully scored |

Marked complete. Scores are locked against accidental taps.

### READ THIS TWICE

**Your scores for a group count only after you tap Mark group complete.** A group you scored but did not mark complete counts for nothing.

## 12 Tap All groups (or < Groups) and pick the next group

KAPE KULTURA now shows ✓ **Complete**. The filters at the top show what is left: Not started, In progress, Complete.

### To change a group you already completed

Open it and tap **Edit scores**. While you edit, your scores for that group stop counting; tap **Mark group complete** again when you are done. You can do this until the coordinator closes the event.

### After the event is closed

The list says **Judging is closed**. You can still look at your scores, but changes are no longer accepted.

| LABEL                       | MEANING                                                                                                                                                            |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ✓ 2 submitted               | Two judges marked it complete. Only these count.                                                                                                                   |
| only 1                      | One submitted sheet. It counts, but a second judge makes the result steadier.                                                                                      |
| 1 in progress · not counted | A judge started and has not tapped Mark group complete. Their name and how far they got are shown, for example "Mr. Paolo Dizon (in progress, 9/21, not counted)". |
| Nothing submitted (red)     | Started, but no sheet submitted: the group has no score in this half yet. LIWANAG LAMPS' booth, above.                                                             |
| No scores (red)             | No judge has touched it.                                                                                                                                           |

## 3 Read By judge, to see who to chase

| By judge                |                                                   |
|-------------------------|---------------------------------------------------|
| <b>Dr. Liza Manalo</b>  | Defense: 6 submitted, 0 in progress (not counted) |
| <b>Engr. Ramon Cruz</b> | Booth: 4 submitted, 1 in progress (not counted)   |
| <b>Mr. Paolo Dizon</b>  | Defense: 5 submitted, 1 in progress (not counted) |
| <b>Ms. Carmela Yap</b>  | Booth: 5 submitted, 0 in progress (not counted)   |

Engr. Ramon Cruz: **Booth: 4 submitted, 1 in progress (not counted)**. Go and ask him to finish and tap Mark group complete.

## 6.2 Correct a judge's score, with a reason

A judge tells you they typed 0 for KAPE KULTURA's "clear ask" and meant 16. You correct it yourself; the judge's own score is kept beside yours.

#### 4 On Progress, press the group's name (or its Defense or Booth label)

One row per criterion (and, for the defense, per student's Presentation, Communication and Q&A), one column per judge, and the **Average of submitted**.

Progress

TAMBIZ 2028 · SCORES AND CORRECTIONS

KAPE KULTURA · Defense

Defense scoresBooth scores

SANTOS, MARIA LOURDES · 3 members. Every judge's scores for this group, one column per judge. To correct a score, type the reason first, then type the new score over the old one (empty it to remove the score). The judge's own score is kept, the cell is shaded and underlined, and selecting it shows what the judge gave and why it changed. Only submitted sheets count.

A member marked absent from the defense has individual scores of zero wherever no judge gave one. To give an absent member a different grade, type their individual scores here with a reason; the workbook and the email file both follow.

| Elevator Pitch     | 4. The pitch closes with a clear ask                 | 20  | 16                          | 16.5                        | 16.25                |
| Elevator Pitch     | 5. Delivery is confident and within time             | 20  | 16.5                        | 17                          | 16.75                |
| Infomercial        | 1. The message is clear and memorable                | 10  | 8                           | 8.5                         | 8.25                 |

Corrected Elevator Pitch 4 (The pitch closes with a clear ask) for Dr. Liza Manalo: 0 → 16. The judge's own score is kept and your reason is recorded. The cell is shaded and underlined; the average is now 16.25.

### IF IT GOES WRONG

A score above that row's maximum is refused and the cell stays red. Empty a cell to remove a score altogether. Select a corrected cell and the line under the table says who corrected it, what the judge gave, and why.

## 7 Reload to see it under Corrections made

Type to change a cell - Enter moves down, Tab moves right - F2 edits the text - Ctrl+V pastes from Excel - Ctrl+F searches - click a heading to sort

### Corrections made

As they stood when this page opened; corrections you make now show in their cells straight away.

**Elevator Pitch 4 (The pitch closes with a clear ask) - Dr. Liza Manalo: 0 → 16**  
Tambiz Coordinator, 9/18/2026, 11:46:54 PM. Reason: Judge confirmed 16, typed 0

Every correction, with who, when and why. The workbook's Scores sheets list them too, in their last column.

You can correct scores while the event is open and after it is closed, until the email file is downloaded.

# 6.3 What stops the event closing

**8 Press the Close the event tab and read Before closing**

Items marked **Needs you** keep the **Close the event** button grey. Items marked **Check** are worth a look but do not stop it.

closing until you download the email file.

**Before closing**

The event can close when every group is fully judged in both halves and every group member has individual scores. For a group that cannot be, record a reason; a member who missed the defense can be marked absent.

1 item needs you before the event can close.

**Needs you** LIWANAG LAMPS: no completed Booth sheet.

Close this group with the scores it has...

Worth a look, but these do not stop the event from closing:

**Check** HALO-HALO HUB: only one completed Defense sheet.

**Check** HALO-HALO HUB: Mr. Paolo Dizon has not submitted their Defense sheet (marked it complete). None of its scores count until they do.

**Check** LIWANAG LAMPS: Engr. Ramon Cruz has not submitted their Booth sheet (marked it complete). None of its scores count until they do.

**Check** TAHANAN TILES: only one completed Booth sheet.

Already decided by you.

1 item needs you before the event can close. LIWANAG LAMPS: no completed Booth sheet. Under it, four Checks: a half with only one completed sheet, and sheets a judge has not submitted.

| NEEDS YOU                                                                             | HOW TO SETTLE IT                                                                                                                                                                                                   |
|---------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>GROUP: no completed Booth sheet</b> (or Defense), or a criterion nobody has scored | Ask the judge to finish and tap <b>Mark group complete</b> . If the group genuinely cannot be fully judged, for example it never set up its booth, use <b>Close this group with the scores it has...</b> (step 9). |
| <b>STUDENT (GROUP) has incomplete individual scores</b>                               | Ask a defense judge to score them, correct the scores yourself (6.2), or, if they missed the defense, press <b>Mark absent from the defense</b> .                                                                  |

**9 Only if a group cannot be judged: Close this group with the scores it has..., type the reason, Accept with this reason**

1 item needs you before the event can close.

**Needs you** LIWANAG LAMPS: no completed Booth sheet.

Close this group with the scores it has...

REASON, KEPT WITH THE RESULTS

For example: did not run a booth

The reason is kept with the results. The missing half stays out of the group's score; it is not counted as zero, and the group is marked **Finalised incomplete** in the workbook. Here the judge finished instead, so nothing was accepted.

6 · Your evening

39 / 65

## 10 Read Already decided by you, and These people will get no email

Already decided by you:

KRISTINE AQUINO (BANIG & CO.) is marked absent from the defense, so their individual scores count as zero. Not absent

These people will get no email:

**No email** JOAQUIN DOMINGO (LIWANAG LAMPS) has no grade yet, so gets no email.

**No email** DENISE MERCADO (LIWANAG LAMPS) has no grade yet, so gets no email.

**No email** ENZO VALDEZ (LIWANAG LAMPS) has no grade yet, so gets no email.

**No email** OCAMPO, DANILO, adviser of LIWANAG LAMPS, has no email, so gets no email. Add an Adviser Email on the Data tab.

Closing locks every judge's scores. A blank score is never counted as zero. You can still correct a score with a reason, and undo closing, until you download the email file.

☐ I have checked the progress

Close the event

Kristine Aquino is marked absent, with **Not absent** to undo it. Under **These people will get no email**: students with no grade yet, and **OCAMPO, DANILO**, adviser of **LIWANAG LAMPS**, has no email.

## 11 Add a missing adviser email on the Data tab

Click the **Adviser email** cell on any row of one of their groups, type the address, press **Enter**. Every row of that adviser follows.

| STUDENT NO. | SURNAME  | FIRST NAME | MIDDLE NAME | SECTION | EMAIL                          | GROUP         | ADVISER               | ADVISER EMAIL             |
|-------------|----------|------------|-------------|---------|--------------------------------|---------------|-----------------------|---------------------------|

| 2025010106  | DOMINGO  | JOAQUIN    | CRUZ        | Sec - 2 | joaquin.domingo@example.edu.ph | LIWANAG LAMPS | OCAMPO, DANILO        | docampo@example.edu.ph    |
| 2025010113  | MERCADO  | DENISE     |             | Sec - 2 | denise.mercado@example.edu.ph  | LIWANAG LAMPS | OCAMPO, DANILO        | docampo@example.edu.ph    |
| 2025010120  | VALDEZ   | ENZO       | LIM         | Sec - 2 | enzo.valdez@example.edu.ph     | LIWANAG LAMPS | OCAMPO, DANILO        | docampo@example.edu.ph    |

docampo@example.edu.ph typed once, on Joaquin Domingo's row; all three LIWANAG LAMPS rows now carry it.

## 6.4 Close the event

## 12 When nothing Needs you, tick I have checked the progress

Check LIWANAG LAMPS. Only one completed booth sheet.

Already decided by you:

KRISTINE AQUINO (BANIG & CO.) is marked absent from the defense, so their individual scores count as zero. Not absent

Closing locks every judge's scores. A blank score is never counted as zero. You can still correct a score with a reason, and undo closing, until you download the email file.

☒ I have checked the progress

"Closing locks every judge's scores. A blank score is never counted as zero. You can still correct a score with a reason, and undo closing, until you download the email file."

## 13 Press Close the event

All events

TAMBIZ 2028 · CLOSED

Close the event

DataJudgesScoring sheetProgressResultsJudge profilesClose the event

The event is closed. Judges can no longer change scores. Download the two files below.

Closing locks judging: judges can no longer change scores, and results and grades are final. It hands over two files: the **workbook** for the department and the **email file** for Microsoft Power Automate to send each student and adviser their results. You can undo closing until you download the email file.

Worth a look, but these do not stop the event from closing:

Check

HALO-HALO HUB: only one completed Defense sheet.

Check

HALO-HALO HUB: Mr. Paolo Dizon has not submitted their Defense sheet (marked it complete). None of its scores count until they do.

Check

LIWANAG LAMPS: only one completed Booth sheet.

Check

TAHANAN TILES: only one completed Booth sheet.

Already decided by you:

KRISTINE AQUINO (BANIG & CO.) is marked absent from the defense, so their individual scores count as zero.

Not absent

The event is closed. Judges can no longer change scores. Download the two files below. The eyebrow now reads **TAMBIZ 2028 · CLOSED**.

## Undo closing

Until the email file is downloaded, you can reopen judging: open **Undo closing...** at the bottom of the tab, tick **Reopen judging**, press **Undo closing**. Judges can change scores again, and a workbook you already downloaded may no longer match. Close the event again when judging is done.

2. The email file

One row per person, with **Email**, **Name** and **Message**, ready for Power Automate: 18 students, each told their letter grade and their group's percentage and never a rank; then 4 advisers, one row each however many groups they hold, listing each group's percentage and which placed in the top 10.

Downloading the email file is final. After it, closing cannot be undone and no score, absence, student or group can change, because the emails would no longer match. Download the workbook and check it first.

☐ Results are final and ready to send

Download the email file

When the download has started, reload this page.

Undo closing...

Judges will be able to change scores again, and a workbook you have already downloaded may no longer match. Close the event again when judging is done.

☐ Reopen judging

Undo closing

Undo closing, opened. Chapter 8 continues with the two files.

# Results, individual grades, judge profiles and the workbook

Results move as judges submit, until you close the event. Only you see these pages; students and advisers see only their own email.

## 7.1 Results: the groups

### 1 Press the Results tab and read Top 10 for the awarding

One card per category, and **Overall**: what is read out at the awarding. Groups still sharing a place are listed alphabetically, and every group tied at 10th is listed, so in a rare year a card has eleven names or more.

#### Top 10 for the awarding

Ranked on the two-decimal percentages shown. When two groups show the same category percentage, the higher overall goes first; they share a place only if both are equal. Every group tied at 10th is listed.

Tambiz 2028 has only six groups, so every group appears on every card. Until any group has a complete category, the page shows **No results yet here**.

## 2 Scroll to Every group: one row per group

Each category's percentage with its rank after the dot (**87.25 · 1**), the **Overall**, its **Rank**, and whether the group is **Complete**. A faint bar behind each percentage shows its size; the leader has a gold edge. Click a heading to sort by it, for example **Paper** for the paper ranking. A category not fully scored shows *incomplete* and no rank; nothing scored shows a dash. Press a group's name to open its scores.

| Every group                                                                                                                                                                                                                                    |                       |                |             |           |              |                          |                    |                            |           |

| 4                                                                                                                                                                                                                     | OCAMPO, DANILO<br>1 ranked group         | 71.40% |

Advisers ranked by the average overall of their ranked groups. Only you see it: an adviser's email lists their own groups' percentages, never a position.

## 7.2 Individual grades

### 4 Under the tabs, press Individual grades

Every student is one row, sorted by section and surname: member total, group overall, final grade, rounded up, letter, quality points, whether they were at the defense, and their status.

All events

TAMBIZ 2028 · OPEN FOR JUDGING

Results

DataJudgesScoring sheetProgressResultsJudge profilesClose the event

GroupsIndividual grades

Final grade = (member total + group overall %) ÷ 2, worked out from the two-decimal numbers shown, rounded up to a whole number, then given its letter. Member total adds up the average Presentation /20, Communication /40 and Q&A /40 across the defense judges who submitted a sheet. A member marked absent from the defense has zero for every one of these nobody scored, and a grade worked out as usual; to change it, correct their individual scores on their group's scores page (press the group's name).

Bands: 92–100 A (4) · 85–91 B+ (3.5) · 78–84 B (3) · 71–77 C+ (2.5) · 64–70 C (2) · 57–63 D+ (1.5) · 50–56 D (1) · 0–49 F (0). A missing score is never counted as zero: a student gets a grade only once their individual scores and their group are complete.

All changes saved

| STUDENT NO. | NAME (PER CLASS ROLL) | SECTION | GROUP       | ADVISER               | MEMBER TOTAL | GROUP OVERALL | FINAL GRADE | ROUNDED UP | LETTER | QP | AT THE DEFENSE | STATUS |
|-------------|-----------------------|---------|-------------|-----------------------|--------------|---------------|-------------|------------|--------|----|----------------|--------|
| 2025010029  | AQUINO, KRISTINE      | Sec - 1 | BANIG & CO. | SANTOS, MARIA LOURDES | 0.00         | 78.60         | 39.30       | 40         | F      | 0  | Absent         | Grade  |

The formula and the FEU bands are printed above the table, so anyone reading over your shoulder can check a grade.

### 5 Find one student with Search, or narrow the list with the filters

Type a name or student number in **Search**. The lists narrow by **Section**, **Group**, **Adviser**, **Letter**, **At the defense** and **Status**; **No grade yet** under Status shows who still needs scores. Select a **Status** cell to see why a student has no grade, or a **Member total** cell to see each judge's three scores (chapter 4).

### 6 To mark a student absent or present, type it in their At the defense cell

TYPE EXACTLY THIS IN THE CELL

Absent

**Present** undoes it. Absent means their unscored individual scores count as zero (chapter 4).

## 7.3 Judge profiles

A basis for knowing your panel, **not for removing anyone**. It describes how each judge scored; it does not say what to do about it. Every comparison uses only co-judges who scored the same group in the same half, and only criteria both scored.

7 · Results, grades and profiles

44 / 65

## 7 Press the Judge profiles tab

How each judge's scores compare with the other judges who scored the same groups, in the same half. A basis for knowing the panel, not for removing anyone. It describes; it does not decide.

**Marking hard is not a fault.** Every group's score is averaged across its judges, so a strict judge is absorbed completely. Severity is context, not a problem.

- Three judges on one evening is a small sample, and the panel's consensus is not the truth.
- A judge who disagrees may be the one paying attention.

### By judge

### Ms. Carmela Yap

Marks at **-3.17 pts** · separates groups: **normal** · agrees with co-judges: **high**. Scores about three points below the panel, spreads groups about as the others do, and ranks them much as the panel does.

Defense · 0 groups **Booth · 5 groups**

| GROUP           | THEIR SCORE | OTHERS' AVERAGE | GAP   | ORDER: THEIRS · PANEL | TO LOOK AT |
|-----------------|-------------|-----------------|-------|-----------------------|------------|
| BANIG & CO.     | 81.17       | 82.50           | -1.33 | 3rd · 3rd             | None       |
| HALO-HALO HUB   | 75.50       | 79.17           | -3.67 | 4th · 4th             | None       |
| KAPE KULTURA    | 85.00       | 90.33           | -5.33 | 1st · 1st             | None       |
| SARI-SARI SMART | 83.33       | 85.67           | -2.33 | 2nd · 2nd             | None       |

Scored with no co-judge, so not compared:

TAHANAN TILES

### Across events

Ms. Carmela Yap, Booth: her score, the others' average, the gap, where the group comes in her order and in the panel's, and anything **to look at**: the same mark entered down a whole category, criteria left blank, or a score 6 points or more from every co-judge. TAHANAN TILES had no co-judge, so it is listed but not compared. **Across events** builds one line per year the judge scores in.

## WORTH REMEMBERING, AS THE PAGE SAYS

**Marking hard is not a fault.** Every group's score is averaged across its judges, so a strict judge is absorbed completely. Three judges on one evening is a small sample, and the panel's consensus is not the truth. A judge who disagrees may be the one paying attention.

## 7.4 The workbook

The first of the two files. Download it on the **Close the event** tab (**Download the workbook**). Before closing it is a preview of the scores as they stand; after closing it is the record. It is made fresh each time, and its name carries the date and time, for example **Tambiz\_2028\_202609182349.xlsx**.

| SHEET                    | WHAT IS ON IT                                                                                                                                 |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Scores</b>            | Every defense judge's scores, one row per judge per group, with corrections in the last column.                                               |
| <b>Booth Scores</b>      | The same for the booth.                                                                                                                       |
| <b>Results</b>           | Every category percentage and rank, both halves, the overall and its rank, and <b>Judged</b> : Complete, Incomplete, or Finalised incomplete. |
| <b>Leaderboard</b>       | Positions 1 to 10 per category and overall, with a Tied row for each further group sharing 10th.                                              |
| <b>Individual Grades</b> | Every student's three scores from each judge, their total, the group overall, final grade and letter.                                         |
| <b>For Encoding</b>      | The official grade sheet, sorted by section: the one you copy into the encoding system.                                                       |

| 27 | Final Grade is (Total Score + Group Overall %) + 2, rounded up to a whole number. Generated 9/18/2026, 11:49:14 PM. |                               |            |         |             |                 |             |              |                                                                      |   |   |

For Encoding: the FEU header lines, then Member Name, STUDENT NAME (per Class Roll), Student ID, Section, Total Score, Group Overall %, Final Grade (rounded up) and Letter Grade. The **Note** column marks absent students and says why a grade is blank. Students with no section are listed first, together, with a line at the end saying how many.

Scores, the first columns: one row per judge per group, with each judge named. The last column, not shown, reads for KAPE KULTURA: **Elevator Pitch #4: judge gave 0, now 16 (Judge confirmed 16, typed 0).**

#### IF IT GOES WRONG

Excel opens it read-only with a yellow **Protected View** bar: press **Enable Editing**. It will not open at all: the download did not finish; download it again. Nothing is lost.

# The two files, and sending the emails

The app sends no email itself. It gives you a file with every email already written, and Microsoft Power Automate sends them from your FEU mailbox.

| FILE              | FOR                                                                      | WHEN                                                |
|-------------------|--------------------------------------------------------------------------|-----------------------------------------------------|
| 1. The workbook   | The department's record, and the For Encoding grade sheet (chapter 7.4). | Any time; after closing it no longer changes.       |
| 2. The email file | One row per student and adviser: Email, Name and the whole Message.      | Only after closing. <b>Downloading it is final.</b> |

## 8.1 Download the email file

### 1 Download the workbook first, and check it

Open For Encoding and read down the Letter Grade column. Look for blanks and for anything surprising. Correct scores now if needed (chapter 6.2): after the next step you cannot.

### 2 On Close the event, tick Results are final and ready to send

The two files

1. The workbook

Scores, Booth Scores, Results, Leaderboard, Individual Grades, and the For Encoding grade sheet.

Download the workbook

2. The email file

One row per person, with **Email**, **Name** and **Message**, ready for Power Automate: 18 students, each told their letter grade and their group's percentage and never a rank; then 4 advisers, one row each however many groups they hold, listing each group's percentage and which placed in the top 10.

Downloading the email file is final.

After it, closing cannot be undone and no score, absence, student or group can change, because the emails would no longer match. Download the workbook and check it first.

Results are final and ready to send

Download the email file

When the download has started, reload this page.

Undo closing...

"Downloading the email file is final. After it, closing cannot be undone and no score, absence, student or group can change, because the emails would no longer match."

8 · The two files and the emails

48 / 65

### 3 Press Download the email file, and when the download has started, reload the page

Already decided by you:

KRISTINE AQUINO (BANIG & CO.) is marked absent from the defense, so their individual scores count as zero. Not absent

The event was closed on September 18, 2026 at 11:49 PM. The email file was first downloaded on September 18, 2026 at 11:49 PM, so nothing can change now.

**The two files**

**1. The workbook**  
Scores, Booth Scores, Results, Leaderboard, Individual Grades, and the For Encoding grade sheet.

[Download the workbook](#)

**2. The email file**  
One row per person, with **Email**, **Name** and **Message**, ready for Power Automate: 18 students, each told their letter grade and their group's percentage and never a rank; then 4 advisers, one row each however many groups they hold, listing each group's percentage and which placed in the top 10.

[Download the email file again](#)

The eyebrow reads **CLOSED, EMAIL FILE DOWNLOADED**, and the page says when: "The email file was first downloaded on September 18, 2026 at 11:49 PM, so nothing can change now." **Download the email file again** gives the same file.

#### READ THIS TWICE

From this moment nothing about the event can change: no score, no absence, no student, no group. If a mistake is found later, correct the grade in the official encoding system and tell the student and adviser directly (chapter 9.7).

## 8.2 What is in the email file

An Excel table named **Emails**, with three columns: **Email**, **Name**, **Message**. Students come first, one row each; then advisers, one row each however many groups they have. A second sheet, **Read me**, repeats the sending steps below.

|   |   |   |   |   |   |   |   |   |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     | |---|---|---|---|---|---|---|---|---|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|

The first rows. Each Message is the whole email, written in HTML.

### What a student receives

Their letter grade and their group's percentage. **Never a rank or a placing.**

**To:** andrea.reyes@example.edu.ph  
**Subject:** (the subject you type in Power Automate)

Hi Andrea,

Congratulations on finishing Tambiz 2028! Thank you for all the hard work you and your groupmates put in.

Here is your result:

- Your letter grade: **B+**
- Your group's score (KAPE KULTURA): **84.01%**

If you have a question about your grade, please talk to your adviser.

Well done!  
The Tambiz team  
MGT1114 Business Plan 2

Andrea Reyes's Message, as it reads in her inbox. The Subject is whatever you type in Power Automate.

### What an adviser receives

Each of their groups with its percentage, and, for each group that placed in the top 10, the categories, never the place. It says plainly that a place in the top 10 is not the same as winning an award.

**To:** mlsantos@example.edu.ph  
**Subject:** (the subject you type in Power Automate)

Dear Maria Lourdes Santos,

Thank you for guiding your groups through Tambiz 2028. Here is how they did:

- **BANIG & CO.: 78.60% · Top 10** in Elevator Pitch, Infomercial, Paper, Product Demo, Best Business Plan Booth, Student Innovation, Best Product Demonstration, Overall
- **KAPE KULTURA: 84.01% · Top 10** in Elevator Pitch, Infomercial, Paper, Product Demo, Best Business Plan Booth, Student Innovation, Best Product Demonstration, Overall

Please note that a place in the top 10 is not the same as winning an award. Awards are announced at the ceremony.

Thank you for your time and support.  
The Tambiz team  
MGT1114 Business Plan 2

Prof. Santos's Message. With only six groups this year, both her groups are top 10 in every category; in a real year the list is shorter.

The wording of every email lives in one file of the app, `src/lib/messages.ts`. Changing it is a programmer's job (chapter 9.3).

## 8.3 Send them with Power Automate

### CONFIRM ON FIRST USE

These steps are the email file's own Read me sheet. The writer of this manual had no FEU Microsoft 365 account, so the Power Automate screens are not pictured. The first time you do it, check the names on screen against each step, and correct this page in pen if they differ.

#### 4 Save the email file to your OneDrive or to SharePoint

#### 5 In Power Automate, start a flow with the Excel Online (Business) action List rows present in a table

Choose the file, and choose the table:

TYPE EXACTLY THIS AS THE TABLE

Emails

#### 6 In that action's Settings, turn Pagination on and set the Threshold to 1000

### IF IT GOES WRONG

Without it, only the first 256 rows are read, and the advisers at the bottom of the file, and some students, get nothing. Count the emails sent against the number of rows.

#### 7 Add Apply to each over the rows, with an Outlook Send an email (V2) action inside it

| FIELD OF SEND AN EMAIL (V2) | SET IT TO                                                                                  |
|-----------------------------|--------------------------------------------------------------------------------------------|
| To                          | the <b>Email</b> column                                                                    |
| Subject                     | your own words, for example <b>Your Tambiz 2028 result</b>                                 |
| Body                        | the <b>Message</b> column. The Body sends HTML as it is, so the message arrives formatted. |

#### 8 Test on yourself first

Make a copy of the file with only one row, put your own address in its Email cell, run the flow on the copy, and read the email that arrives. Only then run it on the real file.

### READ THIS TWICE

**Keep the email file private.** It holds every student's grade. Do not leave it in a shared folder, and delete your OneDrive copy once the emails are sent. The workbook is the record you keep (chapter 9.8).

# Running and looking after it

How to keep Tambiz alive from one year to the next, and how to take it over. Written for a careful person who is not a programmer; where a step needs one, it says so.

## CONFIRM ON FIRST USE

The Vercel and Neon dashboards need their owner's sign-in, which the writer of this manual did not have. Steps in those dashboards follow Vercel's and Neon's own help pages. The first time you do one, check the names on screen and correct this page in pen if they differ. Every step inside the Tambiz app was checked against the app.

## 9.1 What it is made of

### The code · GitHub

The recipe for the app. Changing it is how the app changes.

### The site · Vercel

Builds the code and runs it at `tambiz-calculator-lyart.vercel.app`.

### The database · Neon

Holds every event, student, score and account.

Phones and laptops talk only to the site; the site talks to the database. Nobody opens the database directly.

| PIECE    | WHAT IT IS                                                                                                                                                                   | WHERE                                                                                  | COST                  |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|-----------------------|
| Code     | The public repository <b>benjiesotelo-sudo/Tambiz-Calculator</b> on GitHub. It also keeps the original single-file calculator, <b>index.html</b> . It holds no student data. | github.com                                                                             | GitHub Free: nothing  |
| Site     | The Vercel project <b>tambiz-calculator</b> .                                                                                                                                | Vercel, Singapore (the live site answers from <b>sin1</b> , checked 19 September 2026) | Vercel Hobby: nothing |
| Database | The Neon project <b>Tambiz Calculator</b> , a Postgres database.                                                                                                             | AWS Asia Pacific (Singapore)                                                           | Neon Free: nothing    |

There is no bought web address, no email service and no other paid tool. The emails go out from your own FEU mailbox (chapter 8).

- **Keep the site and the database in the same region.** One click asks the database several questions; across an ocean each would be slow.
- **The database sleeps** after five minutes with nobody using it, and wakes on the next visit. That is why the first page of the day takes a few seconds. Nothing is lost.
- **The free plans** are far larger than one event a year needs. Vercel's Hobby plan is "restricted to non-commercial personal use only"; a course tool with no payments is arguably fine, but if the department is unsure, Vercel's page says to ask Vercel Support. The paid plan, Pro, is \$20 a month per developer.

### The four settings (environment variables) in Vercel

| NAME                       | WHAT IT MEANS                                                                                                                                                     |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>DATABASE_URL</b>        | The database's address with its password built in. Never delete it: without it the site starts on an empty temporary database, wiped whenever Vercel restarts it. |
| <b>SEED_ADMIN_PASSWORD</b> | The coordinator's ( <b>admin@tambiz.demo</b> ) password. While it is set, it is put back on that account every time the site starts (9.4).                        |

|                                |                                                                                                           |
|--------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>SEED_JUDGE_PASSWORD</b>     | The same for the three sample judges, judge1@ to judge3@tambiz.demo. Real judges are never touched by it. |
| <b>TAMBIZ_PREVIEW_DATABASE</b> | Normally absent. Leave it that way: it keeps test copies of a change away from the real data (9.3).       |

## 9.2 The accounts, and who holds them

| ACCOUNT       | WHAT IT IS FOR                                                                                                  | IF ACCESS IS LOST                                                                                                                        |
|---------------|-----------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| <b>GitHub</b> | Keeps the code. Anyone who can write to it can change the app; a change on its main branch goes live by itself. | The site keeps running exactly as it is. No change can be made, including an urgent fix. Recover it through GitHub's account recovery.   |
| <b>Vercel</b> | Builds and runs the site. Holds the settings, the build logs and the Redeploy button.                           | The site keeps running its last version. No redeploy, no setting changes, and route A back into the coordinator account (9.4) is closed. |
| <b>Neon</b>   | Runs the database. Shows the connection string; can restore the last 6 hours.                                   | The app keeps working. Route B back in (9.4) is closed. If the database itself is ever lost, the yearly workbooks are the record (9.8).  |

### READ THIS TWICE

Losing all three at once loses nothing that matters, if the workbooks were kept. That is why 9.8 matters more than any password.

### What to write down, and where

Fill this in by hand and keep it with the printed manual in a locked drawer, or in the department's password manager. Do not photograph it into a shared folder.

| ACCOUNT    | SIGNS IN WITH     | PASSWORD KEPT IN | RECOVERY CODES KEPT IN |
|------------|-------------------|------------------|------------------------|
| GitHub     |                   |                  |                        |
| Vercel     |                   |                  |                        |
| Neon       |                   |                  |                        |
| Tambiz app | admin@tambiz.demo |                  | none                   |

| ALSO NOTE                                 | WRITTEN IN BY, AND DATE |
|-------------------------------------------|-------------------------|
| This page last checked                    |                         |
| Where the yearly workbooks are kept (9.8) |                         |

### NEVER WRITE THESE ON PAPER

The database connection string (it starts `postgresql://`) and the two SEED passwords. Anyone holding the connection string can read and change every grade without signing in. They belong only in Vercel's settings and a password manager.

**Turn on two-step sign-in** for all three accounts and keep the recovery codes each gives you. A lost phone without recovery codes is the commonest way an account is lost for good.

## 9.3 How a change reaches the live site

Nobody edits the live site by hand. A change is proposed, checked, merged, and the site rebuilds itself.

### 1 · Proposed

A programmer opens a pull request on GitHub: the change, with a description.

### 2 · Checked

Vercel builds a test copy on throwaway sample data. The tests run. Someone reads it.

### 3 · Merged

The pull request is merged into the main branch.

### 4 · Live

Vercel builds main and swaps the live site over.

Pull request 7 was merged at 14:34:03 on 18 September 2026 (UTC); Vercel reported the live deployment ready at 14:34:38, 35 seconds later. Allow a minute or two.

## 1 Open the list of changes on GitHub

TYPE EXACTLY THIS INTO THE ADDRESS BAR

`github.com/benjiesotelo-sudo/Tambiz-Calculator/commits/main`

The screenshot shows the GitHub repository page for `benjiesotelo-sudo/Tambiz-Calculator`. The `Commits` tab is selected, showing a list of commits. The commits are grouped by date, with the most recent group being "Commits on Sep 18, 2026". The first commit in this group is a "Merge pull request #7 from benjiesotelo-sudo/fm/tambiz-finish", which is marked as "Verified" and has a green tick with "1 / 1". This indicates that Vercel built this version. The commit hash is `64cf707`. Below this are three individual commits: "no-mistakes(test): Stop Results column headings breaking mid-word" (hash `9b27285`), "no-mistakes(review): Keep leader-row states visible, reset upload form, cap uploads" (hash `d6c99aa`), and "Give every screen the premium finish from the approved references" (hash `977f79b`). The next group of commits is "Commits on Sep 17, 2026", starting with a "Merge pull request #6 from benjiesotelo-sudo/fm/tambiz-cutback" (hash `42d00d1`), followed by "no-mistakes(document): Document adviser inheritance and old sample event replacement" (hash `41ae68f`) and "Put the sample-data replace panel on its own line under the event" (hash `77784da`).

Newest at the top. A green tick with 1 / 1 means Vercel built that version. "Merge pull request #7" is what is live.

## 2 Open a pull request, and scroll to its bottom to see the checks

The screenshot shows the GitHub pull request page for pull request #7. At the top, there is a comment from the Vercel bot, which says "The latest updates on your projects. Learn more about Vercel for GitHub." Below this is a table with the following columns: Project, Deployment, Actions, and Updated. The table contains one row for the project `tambiz-calculator`, with a deployment status of "Ready", a link to "Preview", and a timestamp of "6 hours ago". Below the table, there is a comment from the Vercel bot saying "deployed to Preview 6 hours ago" with a "View deployment" button. At the bottom, there is a comment from the user `benjiesotelo-sudo` saying "merged commit 64cf707 into main 1 hour ago" with a "View details" button. Below this comment, it says "2 checks passed".

Vercel's comment: the test copy was **Ready**, with a Preview link. At the bottom: merged into main, **2 checks passed**. The test copy never touches real data.

### 3 Recognise a failed build: a red X and 0 / 1

The repository's first change, which held only the old calculator and nothing Vercel could build: **X 0 / 1**.

#### IF IT GOES WRONG

A failed build does not break the live site: Vercel keeps serving the last version that built. The change simply is not live. Tell whoever made it; the **X** links to Vercel's log, which needs the Vercel sign-in.

### Redeploying without a change

After changing a setting (9.4) the site must be rebuilt, because Vercel applies new values only to new deployments.

#### CONFIRM ON FIRST USE

In Vercel: open the project, then **Deployments**. Open the newest deployment marked Production and use its **Redeploy** button. Wait until it shows Ready, about a minute.

### Rules for whoever changes the code

Give this list to any programmer you ask for help. It comes from the repository's own notes ( `CLAUDE.md` , `README.md` ).

- **Never edit index.html.** It is the original calculator and the authority on the scoring rules; the tests check the app against it.
- Every scoring change keeps `npm test` passing. The rules, and where the department's decisions deliberately differ from the old calculator, are in `src/lib/scoring.ts`.
- Database changes only add, never remove or rename, because the live database may receive them before the code that uses them.
- **Never commit real student data.** The repository is public. Excel and CSV files are blocked on purpose.
- Never run a copy of the app against the live database without the coordinator's say-so. A copy on a laptop uses its own local database unless told otherwise.
- The app is deliberately small: no new screens, files or sign-ins without the course owner's say-so.

### Upkeep that cannot be skipped

The app is built on Next.js, whose makers publish security fixes, and Vercel retires old build tools. A site not rebuilt for a year may fail to build just when a change is needed. So once a year, a month before the event, a programmer updates it, the checks pass, and it is merged while there is time to fix anything (9.6). It needs Node.js 22 or newer to build.

This manual lives in the same repository, in `docs/manual/` , with a README saying how to print it again after a change.

## 9.4 Passwords and access

| TASK                        | WHO         | WHERE                           |
|-----------------------------|-------------|---------------------------------|
| Add this year's judges      | Coordinator | The workbook, or the Judges tab |
| Give a judge a new password | Coordinator | Judges tab (below)              |

|                                    |                       |                                  |
|------------------------------------|-----------------------|----------------------------------|
| Take a judge off this year's event | Coordinator           | Judges tab (below)               |
| Change your own password           | Anyone                | Account                          |
| Coordinator password lost          | Vercel or Neon holder | Outside the app (routes A and B) |

#### 4 A judge lost their slip: on the Judges tab, click their name and press Reset password

Search judges 4 rows All changes saved

Selected: Engr. Ramon Cruz **Reset password** Remove from this event (Ctrl+Delete)

Reset the password of Engr. Ramon Cruz? Their old password stops working and they are signed out everywhere. Press Enter to confirm or Esc to cancel. **Yes** No

| NAME AS JUDGES SEE IT | EMAIL                   | PROFILE |
|-----------------------|-------------------------|---------|
| Dr. Liza Manalo       | liza.manalo@example.com | Profile |
| Engr. Ramon Cruz      | ramon.cruz@example.com  | Profile |
| Mr. Paolo Dizon       | paolo.dizon@example.com | Profile |
| Ms. Carmela Yap       | carmela.yap@example.com | Profile |

"Reset the password of Engr. Ramon Cruz? Their old password stops working and they are signed out everywhere. Press Enter to confirm or Esc to cancel."

#### 5 Press Enter, then print or write down the new password

All events

TAMBIZ 2028 - CLOSED, EMAIL FILE DOWNLOADED

### Judges

Data **Judges** Scoring sheet Progress Results Judge profiles Close the event

The judges of Tambiz 2028. Most come in with the workbook on the Data tab. To add one here, type their name and email in the last row.

**Sign-in list.** A new judge's password is shown once, on a list laid out to print on one page and hand out at the briefing. The app keeps no copy of a password it can show again, so print the list when it appears: straight after the upload on the Data tab, or here after adding a judge. If a judge loses their slip, select them and press **Reset password**: a new password is shown once in the same way and the old one stops working. Typing the email of a judge from an earlier year adds that account instead, with its password unchanged.

Search judges 4 rows All changes saved

**Print or write these down now.** This password is shown only here, once. The app keeps no copy it can show again; if a slip is lost, use **Reset password** on the Judges tab.

**Tambiz 2028: judges' sign-in**

Open the Tambiz app on your phone and sign in with your email and password.

| JUDGE            | EMAIL                  | PASSWORD              |
|------------------|------------------------|-----------------------|
| Engr. Ramon Cruz | ramon.cruz@example.com | kape-haLo-3651-pandan |

**Print this list** I have printed or written them down

A one-line sign-in list, shown once. Then press **I have printed or written them down**. Closed it too soon? Reset again: each reset makes a new password.

#### 6 To take a judge off the event: select their row, press Ctrl+Delete, then Enter

Sheets they already submitted still count; they can no longer score. The app cannot delete or switch off an account: a removed judge can still sign in and sees the newest event they are still on. To lock someone out completely, reset their password and do not tell them the new one.

#### READ THIS TWICE: THE COORDINATOR'S OWN PASSWORD

If **SEED\_ADMIN\_PASSWORD** is set in Vercel, a password you change under Account does not last: the site puts the variable's password back each time it starts, which Vercel does often. Choose one, and write down which: keep the coordinator password in the variable and change it the Vercel way (route A), or ask the Vercel holder to delete the variable and redeploy, after which Account changes last.

### The way back in when the coordinator password is lost

There is no "forgot password" link, because the app sends no email. Both routes need one of the accounts in 9.2.

## 7 Route A (Vercel): set SEED\_ADMIN\_PASSWORD to a new long password, save, and redeploy

### CONFIRM ON FIRST USE

In Vercel: the project **tambiz-calculator** → **Settings** → **Environment Variables**. Edit **SEED\_ADMIN\_PASSWORD** (or add it) for **Production**, at least 12 characters, Save, then redeploy (9.3).

On its first visit the rebuilt site stores the new password on `admin@tambiz.demo`, clears any wrong-password wait, and signs that account out everywhere.

### IF IT GOES WRONG

Still refused? The redeploy has not finished, or the variable was saved for Preview only. Check it is set for Production and redeploy again.

## 8 Route B (Neon and a programmer): run the reset from a copy of the repository

Works for any account. The Neon holder copies the connection string (Neon project → **Connect**) and gives it to the programmer through a password manager, never by email or chat. In the repository folder, after `npm install`:

### TYPE EXACTLY THIS, WITH THE REAL CONNECTION STRING AND A NEW PASSWORD

```
DATABASE_URL="paste the connection string here" npm run reset-password --  
admin@tambiz.demo "a new long password"
```

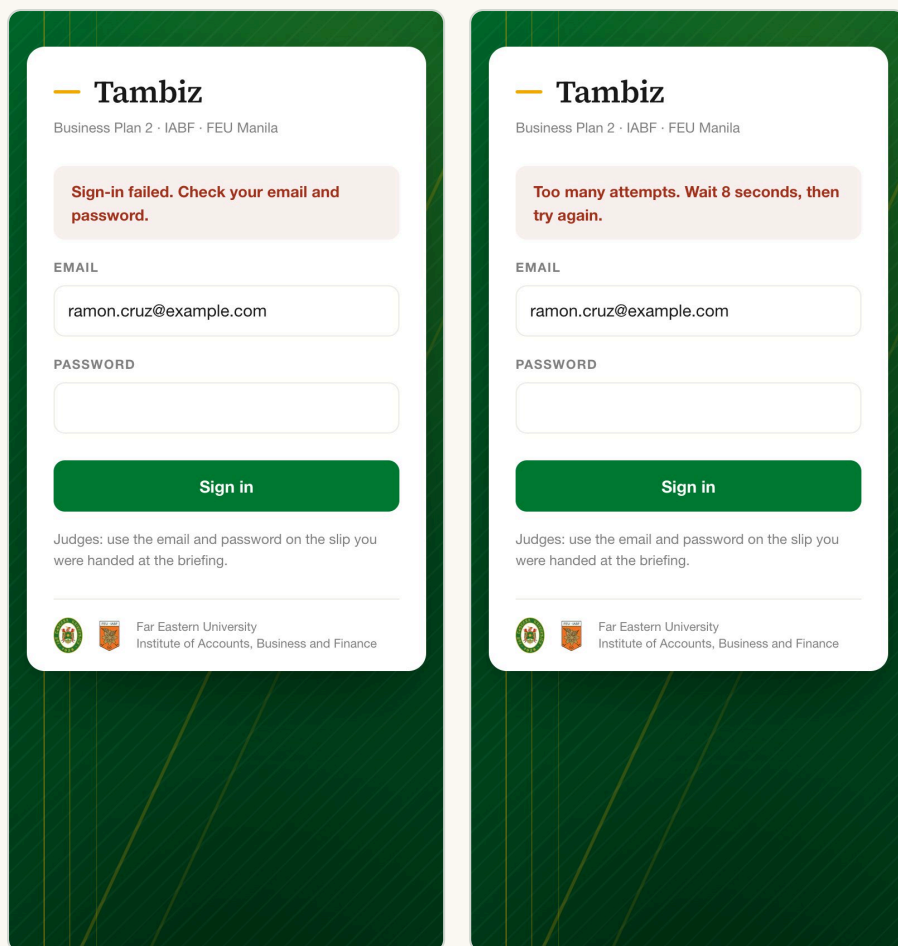

It answers: **Password reset for admin@tambiz.demo. Every session for that account was signed out.**

### IF IT GOES WRONG

**Use at least 12 characters.** The new password is too short. **No account with the login ...** The email is spelled differently from the account; nothing changed. If **SEED\_ADMIN\_PASSWORD** is still set, the next restart puts that password back.

## Wrong passwords and waiting

After three wrong passwords in a row an account waits 10 seconds, then 20, then 40, doubling up to 5 minutes, and says **Too many attempts. Wait ... seconds, then try again.** The right password after the wait works normally. Reset password and both routes clear the wait at once.

One wrong password.

After four.

## 9.5 The yearly cycle

Every year is a new event. Almost nothing is copied into it, on purpose.

| CARRIES OVER BY ITSELF                                                                                                                                                                                                                           | DO AGAIN EACH YEAR                                                                                                                                                                                         | NEVER CARRIED OVER                                                                                     |

## 9 On Events, check the Year and press Create event

COORDINATOR

### Events

Each year's Tambiz is one event. Its students, groups, judges and scores all belong to it.  
A practice event is for trying the app out.

|                                                                          |                               |
|--------------------------------------------------------------------------|-------------------------------|
| Tambiz 2028<br>2028                                                      | Closed, email file downloaded |
| PRACTICE - Tambiz 2027<br>2027 Practice: invented data, not a real event | Practice Open for judging     |

Start a new event

YEAR  
2029

TITLE  
Tambiz 2029

The scoring sheet is copied from the newest event, so this year's maximums carry over.

Create event

Every past event stays in the list, newest first, with its state: **Closed, email file downloaded**.

## 10 Check the Scoring sheet tab says 39 of 39 criteria have wording

A new event copies from the newest event, meaning the latest year. If it shows no wording, the event it copied from had none; paste it again (chapter 3). A new event spells the second defense category **Infomercial**, even if an older one had "Informercial".

### READ THIS TWICE

Points, the 70/30 weights and the letter bands cannot be changed on screen. Changing them is a programmer's job, done before next year's event is created and checked with the tests. Ask a month ahead, never on the day. Leave last year's event as it is: never delete it, and never put this year's students into it.

## 9.6 A month before the event

Most problems of a once-a-year app come from the eleven months nobody touched it. Tick each box in order.

- ☐ **Re-read the free-plan pages** of Vercel and Neon. Check both still cost nothing. If either has changed, decide what to do before anything else. **COORDINATOR**
- ☐ **Update the app and redeploy.** A programmer updates the framework, runs the tests and merges; check the green tick (9.3). **PROGRAMMER**
- ☐ **Sign in and look.** Open the live site, sign in as coordinator, open last year's event and its Results. **COORDINATOR**
- ☐ **Test the way back in, without using it.** Find SEED\_ADMIN\_PASSWORD in Vercel, or note that it was deleted; find Neon's Connect button. Update 9.2. **ACCOUNT HOLDERS**
- ☐ **Create this year's event** and check its wording (9.5). **COORDINATOR**
- ☐ **Build, check and upload the workbook** (chapters 2 and 3). **COORDINATOR AND STAFF**
- ☐ **Print the judges' slips.** **COORDINATOR**
- ☐ **Run the ten-minute rehearsal** below. **COORDINATOR**
- ☐ **The day before:** open the live site once, and ask every judge to sign in on their phone. **COORDINATOR, JUDGES**

## The ten-minute rehearsal, on the practice event

### READ THIS TWICE

A judge always sees the newest event they are on. Rehearse with a **separate rehearsal account added only to the practice event**, never with a real judge who is already on this year's event, or their rehearsal scores land on the real one. The app cannot delete a sheet of scores, so never rehearse on the real event.

### 11 Open PRACTICE · Tambiz 2027, then its Judges tab, and add a rehearsal judge in the last row

TYPE EXACTLY THIS, PRESSING TAB BETWEEN THE CELLS

Rehearsal judge                      rehearsal@tambiz.demo

Print the password it shows. Next year, add the same email again and press Reset password.

### 12 On a real phone, sign in as the rehearsal judge and score one group's defense

### 13 Halfway, turn Airplane Mode on, keep scoring, then turn it off

You pass if the label counts the kept scores while offline (chapter 5, step 7), returns to **All saved** by itself, and the scores appear on the laptop's Progress tab. If it never returns to All saved, note the phone and browser and tell the programmer before the night.

## 9.7 When something goes wrong

Find the symptom, then do the fix.

### The site will not load at all

|     |                                                                                                                                                                                                                                               |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WHY | Vercel or Neon is down; a free-plan limit was reached; or DATABASE_URL was removed.                                                                                                                                                           |
| FIX | Check vercel-status.com and neonstatus.com, and try every ten minutes. Ask the Vercel holder to look for a limit message and check DATABASE_URL. If judging cannot wait, score on the original calculator (below) and enter the scores later. |

### The first click of the day is slow

|     |                                                                                               |
|-----|-----------------------------------------------------------------------------------------------|
| WHY | The database was asleep (9.1).                                                                |
| FIX | Nothing is wrong. Open the site yourself ten minutes before judging, and before a break ends. |

### A judge cannot sign in

|     |                                                                                                                                                                                               |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WHY | A typo, an extra capital or space from the phone's keyboard, or several wrong tries.                                                                                                          |
| FIX | Check their email on the Judges tab. Still failing: Reset password (9.4), which also ends the wait. If they see <b>No event yet</b> , they are not on this event: add them on the Judges tab. |

### A judge says they scored a group, but it does not count

|     |                                                                                                                                                                             |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WHY | Almost always: they never tapped <b>Mark group complete</b> . Otherwise the scores are still on their phone: <b>Offline · 3 kept on phone</b> or <b>Sign in to send 3</b> . |
| FIX | Ask them to open the group on the same phone and browser, get online or sign in again, then Review and Mark group complete. Progress shows the result.                      |

## An upload refuses a group, or skips rows

|     |                                                                                                                        |
|-----|------------------------------------------------------------------------------------------------------------------------|
| WHY | The group's rows name different advisers or adviser emails; a row misses a required cell or has an address with no @.  |
| FIX | The shaded box names the rows. Fix them in Excel and upload the same file again; nothing is added twice (chapter 2.3). |

## A student's email or section was wrong

|     |                                                                                                                                             |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------|
| WHY | They upload silently (chapter 2.3).                                                                                                         |
| FIX | Before the email file is downloaded: type the right one in the Data table. Emptying a cell in the workbook and uploading does not clear it. |

## A grade looks wrong

|     |                                                                                                                                                                                                                             |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WHY | Usually a rule doing its job: an unsubmitted sheet does not count; the grade is rounded up; an absent student has zeros.                                                                                                    |
| FIX | On Individual grades, select their Member total cell for each judge's scores, and check by hand with chapter 4. Look for a correction on the group's scores page. Before the email file: correct with a reason (chapter 6). |

## A mistake is found after the email file was downloaded

|     |                                                                                                                                                      |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------|
| WHY | Nothing can change in the app after that moment, by design.                                                                                          |
| FIX | Correct the grade in the official encoding system, tell the student and adviser directly, and keep a note with the workbook of what changed and why. |

## Some people got no email

|     |                                                                                                                |
|-----|----------------------------------------------------------------------------------------------------------------|
| WHY | Pagination was off in Power Automate (only 256 rows read); the adviser had no email; the student had no grade. |
| FIX | Chapter 8, step 6. The Close the event tab listed everyone who would get no email.                             |

## Nobody can sign in as coordinator

|     |                                                                                         |
|-----|-----------------------------------------------------------------------------------------|
| WHY | A forgotten password, or one changed under Account and put back by SEED_ADMIN_PASSWORD. |
| FIX | Try the password kept in the variable first. Otherwise route A or B (9.4).              |

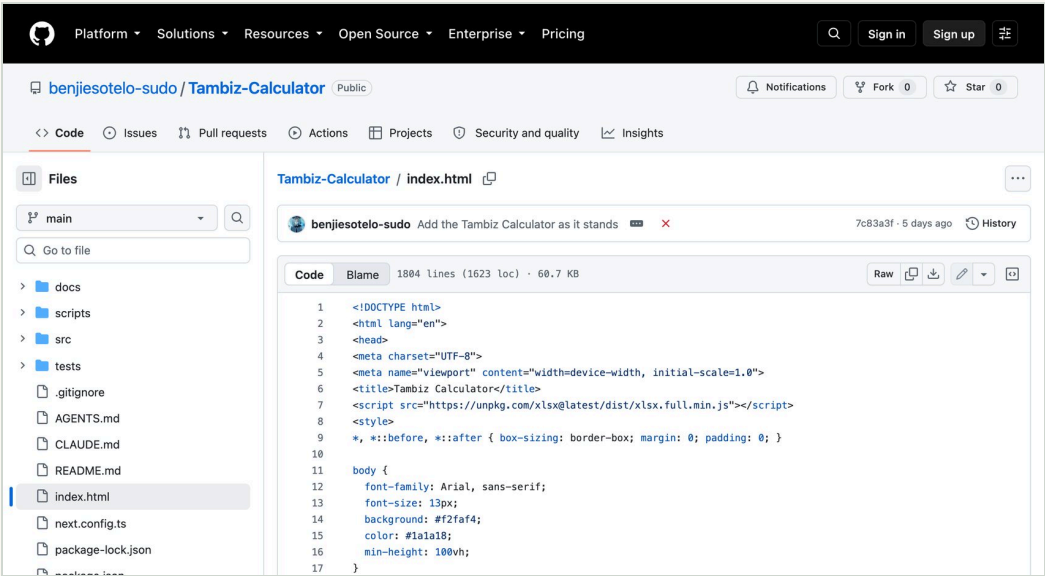

## A change did not go live

|     |                                                                                                   |
|-----|---------------------------------------------------------------------------------------------------|
| WHY | The build is still running, or it failed and the site kept the previous version.                  |
| FIX | Wait two minutes and reload. Look for the red X on GitHub (9.3) and send the programmer its link. |

If the app is gone on the night: the original calculator

14 Open index.html on GitHub and press the download arrow beside Raw

TYPE EXACTLY THIS INTO THE ADDRESS BAR  
github.com/benjiesotelo-sudo/Tambiz-Calculator/blob/main/index.html

The file page. Double-click the downloaded index.html to open it in a browser; it needs no account.

IF IT GOES WRONG

The old calculator uses old rules: a score above the maximum is quietly changed to the maximum, and a blank can count as zero. Check every row by eye, and save its Excel file before closing the tab. The app cannot import it.

9.8 Keeping the records

The database is where the app works. The workbook is what the department keeps.

| THE DATABASE                                              | THE YEARLY WORKBOOK                                                |
|-----------------------------------------------------------|--------------------------------------------------------------------|
| Neon's free plan can restore only the last 6 hours.       | A file that never changes once saved.                              |
| Free plans have been withdrawn before by other companies. | Opens in Excel, with no account, for as long as Excel exists.      |
| Results are worked out afresh each time a page opens.     | A snapshot of every score, correction, percentage, rank and grade. |
| Reachable only through the app.                           | Readable by anyone the department trusts with grades.              |

15 Download the workbook after closing, and once more just before the email file

16 Save it in one OneDrive folder per year, shared with one other trusted colleague

FOR EXAMPLE, A FOLDER NAMED EXACTLY THIS  
Tambiz records / Tambiz 2028

Keep the email file out of it, private, and delete it once the emails are sent.

## READ THIS TWICE

**Never put a workbook in the GitHub repository.** It is public, and the workbook holds real names, student numbers and grades.

### Reading a past year

| THE QUESTION                                      | SHEET                |
|---------------------------------------------------|----------------------|
| What grade did a student get?                     | For Encoding         |
| How was that grade made?                          | Individual Grades    |
| How did a group do in each category?              | Results              |
| Who placed in each category?                      | Leaderboard          |
| What did each judge give; was anything corrected? | Scores, Booth Scores |

## 9.9 Handing it over

In this order, in person if you can, ticking each together.

- ☐ **The three accounts.** Sit together, sign in to GitHub, Vercel and Neon, and change each account's email and password to the successor's, with their own two-step sign-in. Fill in 9.2 afresh and destroy the old page.
- ☐ **This manual:** the printed copy with its filled-in pages, and the PDF in the repository (`docs/manual/Tambiz-Manual.pdf`). Read chapters 1 and 9 together.
- ☐ **The yearly workbooks.** Share the Tambiz records folder with the successor, so it does not live only in the leaving person's OneDrive.
- ☐ **The repository and its README,** which says how to run the app on a computer and build the site again on new Vercel and Neon accounts. A new site gets a new address.
- ☐ **The coordinator sign-in,** and the SEED\_ADMIN\_PASSWORD decision (9.4). Then do 9.6 together once.

| WHO TO ASK ABOUT                    | NAME                | HOW TO REACH THEM                                     |

# What is not built yet

An honest list, so nobody is surprised on the night. The app was cut back on purpose in September 2026; some of these are choices, not oversights.

| NOT THERE                                                 | WHAT TO DO INSTEAD                                                                                                                                                                                                                   |
|-----------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Changing points, weights or letter bands on screen</b> | Only the criterion wording can be changed. Each event keeps the sheet it was created with. A programmer changes the default before next year's event is created (9.5).                                                               |
| <b>Renaming a group that already has scores</b>           | A group is its name: a new name makes a new group, and the scores stay with the old one. Get group names right before judging starts.                                                                                                |
| <b>Deleting a sheet of scores</b>                         | There is no button to delete a judge's whole sheet, for example after a rehearsal; only one score at a time, by emptying its cell with a reason. Rehearse on the practice event (9.6).                                               |
| <b>Deleting or disabling an account</b>                   | Remove the judge from the event and reset their password (9.4).                                                                                                                                                                      |
| <b>A "forgot password" link</b>                           | The app sends no email. Judges: Reset password. Coordinator: routes A and B (9.4).                                                                                                                                                   |
| <b>Forcing a new judge to change their password</b>       | Judges can change it under Account; they are not made to.                                                                                                                                                                            |
| <b>Full offline mode</b>                                  | Scores typed offline are kept and sent later, but a phone that has never opened the app cannot load it offline, and reloading with no connection shows the browser's offline page. Every judge signs in once beforehand (chapter 3). |
| <b>Sending the emails</b>                                 | The app writes them; Power Automate sends them (chapter 8). The Power Automate screens are not pictured in this manual.                                                                                                              |
| <b>Checking that an email address is the right one</b>    | Only its shape is checked. A second person reads the Email column (chapter 2).                                                                                                                                                       |
| <b>Frozen results and file history</b>                    | Closing locks the scores, but results are worked out afresh each time; the saved workbook is the snapshot (9.8).                                                                                                                     |
| <b>A screen for the change history</b>                    | Score corrections are listed on each group's scores page and in the workbook. Other changes (uploads, moves, closing) are recorded in the database with no screen to read them.                                                      |
| <b>Corrections after the email file</b>                   | Nothing can change once it is downloaded, and there is no "send corrected results" step (9.7).                                                                                                                                       |
| <b>Sign-ins for students or advisers</b>                  | Deliberately none. Each gets one email.                                                                                                                                                                                              |

# At a glance

One page to keep beside you. The chapter for each line is in brackets.

|                                     |                                                                                                                                                  |
|-------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>A month before</b>               |                                                                                                                                                  |
| Update, redeploy, rehearse          | Checklist and ten-minute rehearsal on the practice event (9.6)                                                                                   |
| <b>Setting up</b>                   |                                                                                                                                                  |
| Build the workbook                  | From the template: Students and Judges sheets, the five check formulas, a second reader for emails (2)                                           |
| Create the event                    | Events → Year → Create event (3.2)                                                                                                               |
| Criterion wording                   | Scoring sheet → paste 39 lines → Save wording (3.3)                                                                                              |
| Upload                              | Data → Choose File → Upload workbook → read the shaded box (3.4)                                                                                 |
| Judges' slips                       | Print this list, straight after the upload. Shown once (3.4)                                                                                     |
| Before the night                    | Every judge signs in once on their phone (3.7)                                                                                                   |
| <b>On the night</b>                 |                                                                                                                                                  |
| Judges                              | Defense or Booth → group → score → Review → <b>Mark group complete</b> (5)                                                                       |
| Watch                               | Progress: chase <b>in progress</b> · <b>not counted</b> and red labels (6.1)                                                                     |
| Correct a score                     | Group's name → reason → type over the score → Enter (6.2)                                                                                        |
| Lost slip                           | Judges → select → Reset password → Enter → print (9.4)                                                                                           |
| <b>Closing</b>                      |                                                                                                                                                  |
| Settle                              | Close the event → everything under <b>Needs you</b> (6.3)                                                                                        |
| Close                               | Tick <b>I have checked the progress</b> → Close the event (6.4)                                                                                  |
| File 1                              | Download the workbook, check For Encoding, save it to the records folder (7.4, 9.8)                                                              |
| File 2, final                       | Tick <b>Results are final</b> → Download the email file. Nothing can change after (8.1)                                                          |
| Send                                | Power Automate: table <b>Emails</b> , Pagination 1000, test on yourself first (8.3)                                                              |
| <b>The rules that decide grades</b> |                                                                                                                                                  |
| Grade                               | $(\text{Member total} + \text{group overall}) \div 2$ , <b>rounded up</b> , then 92 A · 85 B+ · 78 B · 71 C+ · 64 C · 57 D+ · 50 D · below F (4) |
| Always                              | Only submitted sheets count · a blank is never a zero · absent means zero · ties by overall · two decimals (1, 4)                                |
